### WB-SD2

This is our wine barrel mounted and independent Steel drum with two congs. It is self sufficient and only needs to be connected to a MIDI out port on any PC or MIDI data filer. This is an accessory to any of our MIDI units or a stand alone Steel Drum system.

MIDI Steel drum for the top of a GIB, MIDI piano or shelf. Self contained less PC: \$12,950

### WB-SD

Same as the above without the congs. Has a midi in and out port to daisy chain to our other instruments.

Price - \$12,950

### Jukebox

### WB-jb

This is a genuine solid oak winebarrel stabilized and with a state of the art Musical Jukebox program of handling 5,000 songs per session. Coin op is standard and a battery back up is available at an extra charge. Running our Ragtime program it will keep track of songs are played and how many. Special playlist can be created to 100 songs in each list. Songs are played in random or sequential order. Absolutely a hit. Available and wheels are optional.

Price - \$8,450

Our MIDI Steel drum with PC and touch screen. Coin op shown, but not included. Contains Synthesizer and Surround Sound as well as the MP3 Jukebox function. Simply Amazing. 25 songs included free. Price \$17,400

### WBSDy

### WB-25A

Roll operated 25 note Accordion Price: \$10,950

### 3SDm

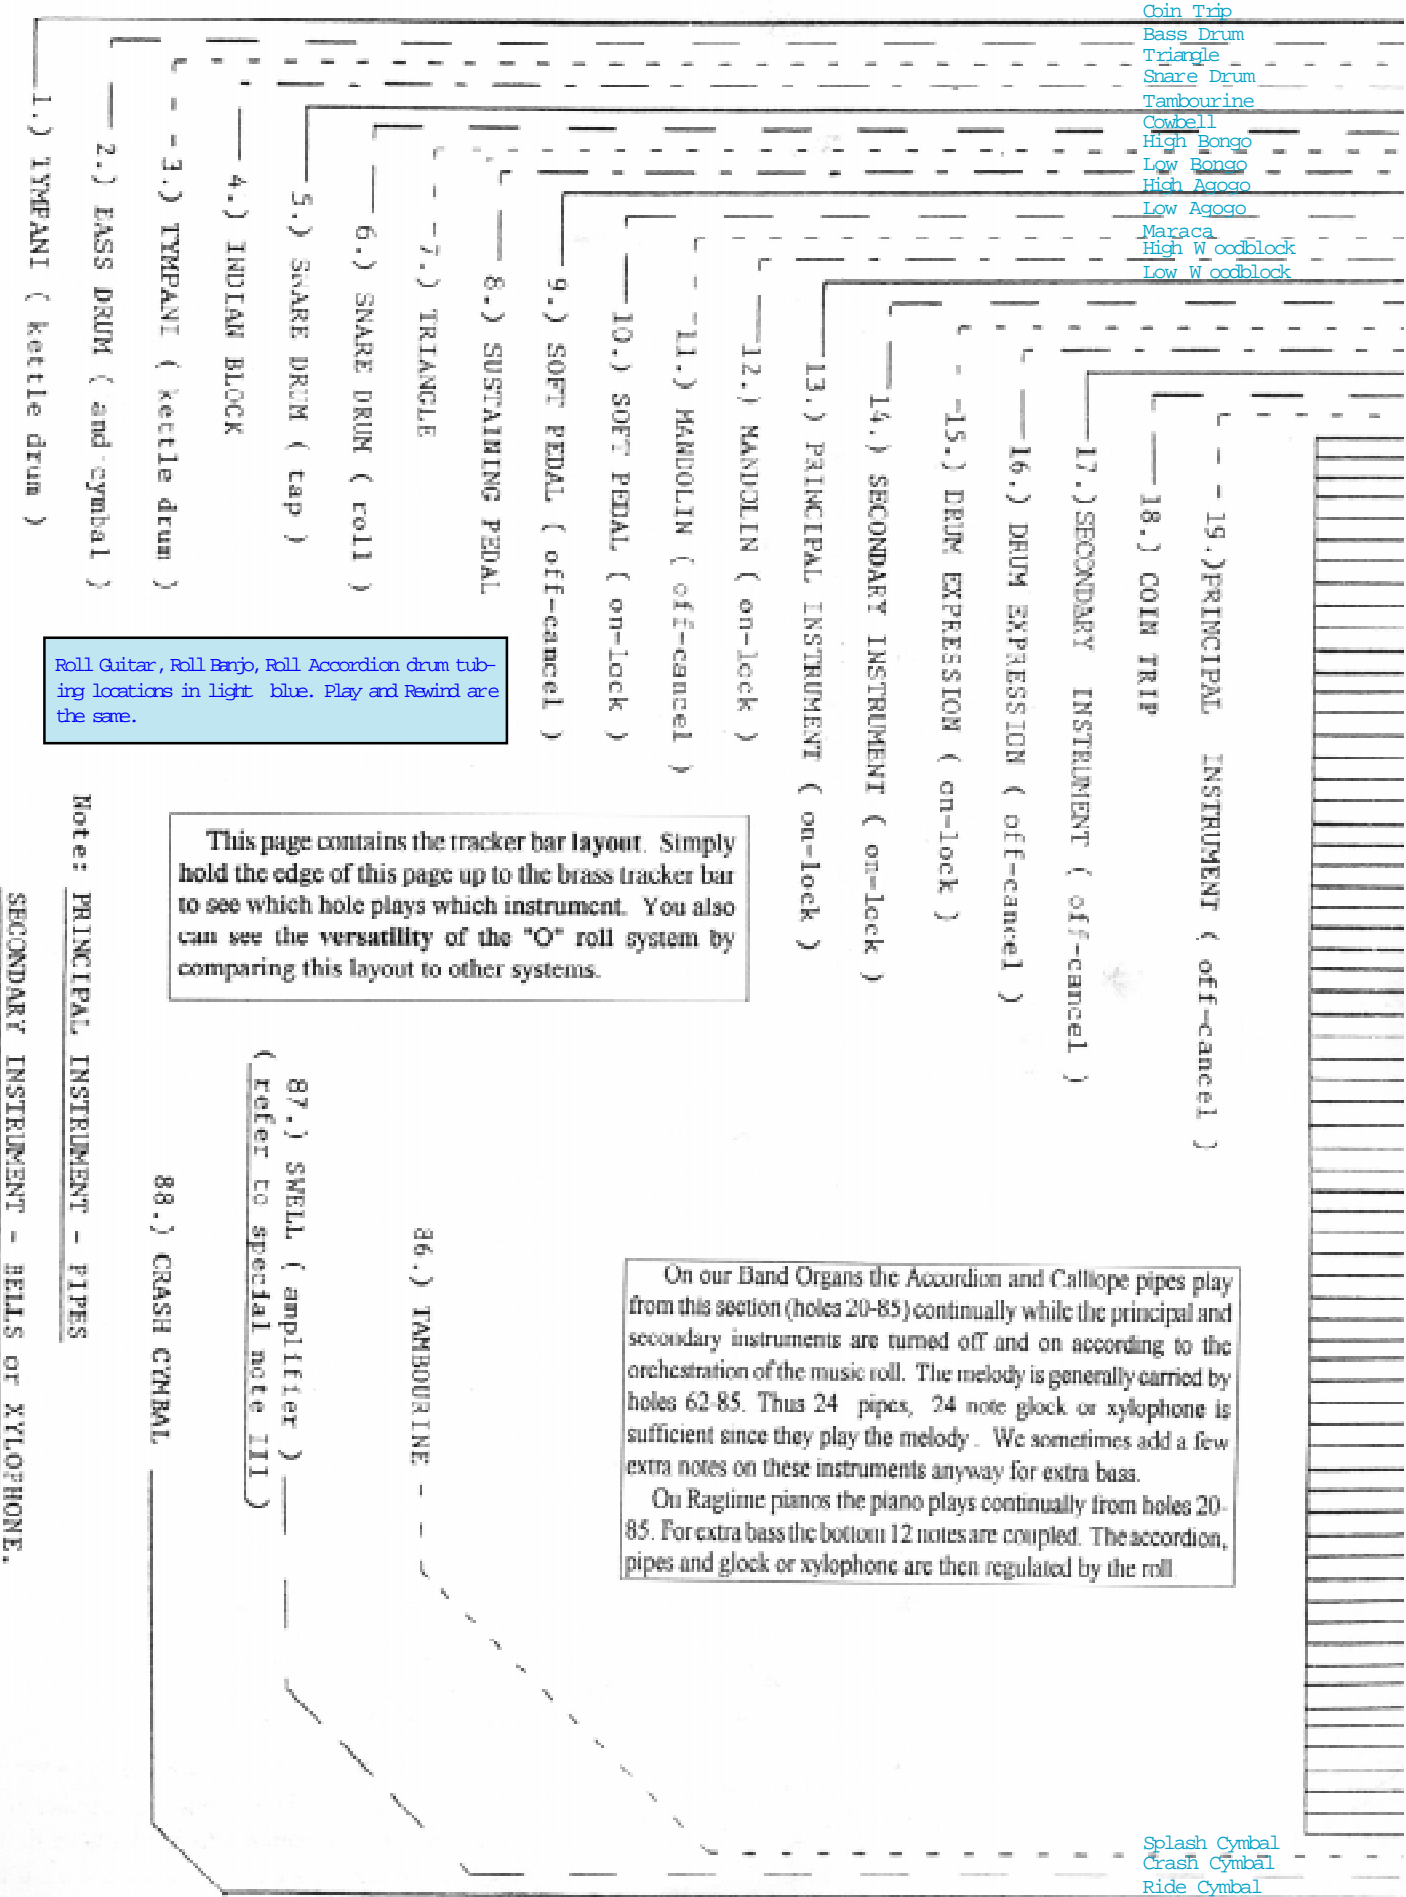

\$29,500

### WB-SDr

Roll operated steel drum mounted on an authentic Oaken wine barrel. Plays 10 tune O rolls and Ragtime SD rolls that automatically rewind to play again. Percussion instruments are available as well. 25 cent coin operation is standard.

Price - \$12,950

NOTE: #4 INDIAN BLOCK, #6 SNARE DRUM roll, #86 TAMBOURINE and XYLOPHONE or BELLS must have self-repeating pneumatic.

### Trading Policy

All related items are of interest. Antique airplanes to accordions. Antique tractors, engines and steam power plants. Antique clocks, wood barber chairs and slot machines. What ever is interesting in a museum, we would be interested in trading. Just call or send photos. All offers welcome. Shipping will be arranged by us. Prices will be set fairly and invoiced accordingly.

#### Notes on our "O" roll Kits

We have made space-saving a must in designing all of our equipment without sacrificing quality. All 6 instruments will easily fit in any upright piano without modifying the case! You do not need to use plain Jane old player piano cases. Use the delightful antique uprights to convert!

Before beginning installation, make sure all the necessary piano work is done, especially action work. If you wish to do the work yourself, you may order repair books, parts and tools.

The "O" roll will have from 10 to 15 songs with automatic rewind and play standard. The scale is in the manual. The coin operated pianos are turned off at the end of each song unless you put a piece of tape over the coin trip hole. Then you can play 2 songs or more per quarter. If you put an extra hole in line with the coin trip hole you can force a 50 cent play or more. Using tape and holes you can have 3 songs for two quarters, etc.

The suction motor has two sides on an "O" roll unit, the primary side which has full vacuum at all times and the secondary side which has regulated air and is turned off on rewind to prevent backwards playing. The primary air operated pneumatics required to function while the unit is in rewind such as the rewind pneumatic and rewind lock and cancel. The coin trip uses secondary air.

There is a third vacuum system as well. This is a cutout for secondary instruments such as the glockenspiel. It can be operated by a Lock and Cancel device which will turn it on and off as the roll requires it to.

You may use our vacuum cut-outs to control instruments.

We also supply primary valves. They allow you to operate more than one instrument from a single tracker bar hole such as Piano and Glock or piano, Glock and pipes. They also allow the tubing to be much longer without interfering with the operation. The signal tube from the tracker bar operates the primary valve which in turn operates 2 or more other pneumatic devices.

Our Calliope pipes operate satisfactorily without a pressure reservoir. However, some applications may exist.

Our units play fine without a vacuum reservoir, however some applications may exist as well. Such as when the piano is expected to play at very low volumes for extended times.

The "O" roll system has 88 holes plus play and rewind. With 66 playing notes you are left with 22 holes to operate various instruments and expression systems. The first 19 holes from left to right (not counting the large play hole) are for instrumentation. The #20 hole is the first playing note (E) which is the second E on the keyboard counting from left to right. #85 hole is the last playing note and the holes #86-#88 are for instruments. All holes from #20 to #85 are for piano notes.

If a more powerful bass is desired then we supply a double bass kit for 12 extra bass notes tubed to the last 12 regular pneumatics on the left.

The "O" roll system uses a solo register. This is the last 24 notes on the right. Holes #61 through #85. The arranger will place the melody within this section while the primary or secondary instruments are engaged. This is why a vacuum cut out is used on the Glock or pipes.

The "O" roll system uses a lock and cancel device. This device simply turns on when there is a momentary signal then waits for a momentary signal to turn it off. This eliminates the need for long perforations in the roll which may wear easily.

#### Delivery notes:

Allow 6 to 8 weeks for delivery. Large instruments must be shipped crated in plywood with skids for forklift. One year replacement guarantee on all parts. Maintenance instructions available especially for the larger commercial models. Our modular system makes maintenance a breeze for your staff

On site extended warranty available at a rate of 10% of the purchase price per year, anywhere in the U.S.A. Overseas warranty available on site for a slightly higher percentage.

All Ragtime MIDI components will daisy chain to the next one with a simple 2 wire MIDI cord. Maximum distance between processors is 50 ft. Maximum number of processors is 16 unless wireless MIDI is used. Then there is virtually no limit. The length of time sound travels is about 1,000 ft per second. This will cause a lag in music when the instrument are placed too far apart. Sound waves are the biggest limiting factor.

When two or more units are ordered simultaneously, you may want to inquire about wholesale. Just supply us with your business card and a copy of your business license, and we will forward you the wholesale price sheet.

Fantastic  
Attraction  
Quality  
Mechanical  
Music  
Systems

### Horse Drawn Band Wagon

Complete with 14 note Tympani drums and every other instrument listed in this catalog except the ukulele. Complete drum set! Piano and accordion are not shown and are on the other side. Ragtime mechanical music systems are virtually limitless. 12 volt Battery powered, 120 vac or both, this unit is designed for parades. Excellent show stopper, may be pulled by a small tractor as well. The wagon is 12 feet long and 6 feet wide at the axles. Neither horse nor Model T Ford Truck is included. Approximate weight is 2,800 pounds. Complete with Ragtime software, IBM laptop and 200 songs in 10 categories.

Price - \$239,000

We rent this unit out for special events for \$2,000 per day plus transportation to and from the event. Most units in this catalog are in stock and can be leased as well.

If you had the job of finding an attraction that was unique, unequalled and guaranteed to attract free publicity many times more valuable than the cost of the attraction. Here is what I would recommend. Start exclusively with Ragtime's custom made orchestral quality automated instruments. Our products are rated for 100% duty cycle and use advanced technology in the pneumatics field to accomplish this. This means no electrical contacts to fry or solenoids to overheat.

You may need sound amplification and distribution system. Each instrument can be discreetly represented by a quality microphone and mixed to the speaker system. This will add to the balance of the total system and make up for the relatively low speed of sound across a large presentation. (Over 100 feet wide). It will also better serve a large audience which may be walking around. Each instrument must also be represented by its own speaker and equalizer. This can be accomplished by high quality mixers and amplifiers.

Now all instruments must be serviceable from the back side of the mounting wall. This will virtually eliminate down time, and can be serviced while the unit is playing. This means a false wall and walkway of at least 4 feet clearance behind for maintenance personnel. Instruments mounted above the floor will need walkways behind them as well.

Coordination with architects, electrical and mechanical engineers, set designers, post production products such as CDs and Tapes of the music done in our in house digital recording studio set up specifically for our Automated Orchestra.

Large installation like this requires time to build. It will also be completely preassembled so that it can be tested fully at the factory. Space is required for set up. Since jobs like this always needs to be on time, it will have to be finished as early as possible and then kept fully assembled until shipment. Jobs this size take a few months to complete.

Special instruments not listed in the catalog, such as Harp, are available. Special projects are our specialty and can be added at any time in the future.

## Brief History Of Ragtime Automated Music

Ragtime Automated Music, affectionately known by many as just Ragtime, was founded in 1971 by Ken Caulkins of Modesto, California. Upon building his first nickelodeon, the Gallo family had him entertain at many parties and picnics. Bob Gallo even ordered one for his home. Many guests at the party ordered custom nickelodeons in the 1970's and thus began the nickelodeon company that has been responsible for the construction of nearly 8,000 instruments. Also in the '70s, Paramount Pictures purchased a Ragtime Nickelodeon for the set of Cheers where it can still be seen in the reruns. Other movies, amusement parks, wax museums, circuses, carnivals and miniature golf courses as well as pizza parlors and restaurants use Ragtime products to entertain their customers. In the 1980's The Sharper Image took their nickelodeons to mass market with pianos in more than 50 stores. They sold hundreds, and kept Ragtime busy for years and too busy to develop new products for awhile. In the 1990s, Ragtime developed the MIDI acoustic orchestra. Ragtime also was given the distinguished honor of being on the cover of the Hamacher Schlemmer catalog. With MIDI devices being a large part of Ragtime's business, the decision was made to produce a product line of MIDI products.

Ragtime produces 90% of their components in their modern facility. Although many of the small parts are manufactured with automation, the cabinets and final assembly are still done by hand. Their research and development department contains automated plastic injection machines, CNC mill, electron discharge machine, and a complete tool and die shop. Also well equipped is their wood prototype shop capable of turning out a finished product in days to match their newly conceived or specially ordered product.

Many Ragtime custom products are not pictured in this catalog. MIDI units are priced from \$3,000 to \$150,000. However Ragtime keeps many standard items in stock.

Ragtime MIDI valves use a small electric current (120 ohm, 12 volts DC) to operate. The signal processor decodes the MIDI bit stream into electrical impulses. These impulses are picked up at the terminal strip and wired to each corresponding MIDI valve. The operation is very simple. Simply attach note number one MIDI valve to output number one, etc. The MIDI sequence is produced by a software program either in a computer or a MIDI data file. The MIDI bit stream is carried on one wire with a ground. You only need two wires to connect two processors together. You may connect up to 16 processors. Each processor uses the same MIDI bit stream. The information contains channel numbers. You may have up to 16 channels. Each processor is programmable. You may decide which channels it recognizes for its outputs. You may also partition your processor. This is easy using the Windows compatible program included. The partitions can be outputs that each channel addresses and the MIDI notes they recognize. You simply tell it which output to activate with which MIDI note. We supply you with a suggested MIDI map of outputs and MIDI notes on page 21. Each unit comes pre programmed but you may easily change it. Each processor has 128 outputs for a total of 2,048 possible outputs per MIDI song. This gives a lot of room to expand the MIDI orchestra. One output can equal one note or one drum. In either case it is just one actuator.

All Ragtime components are modular. Simply loosen a screw, unplug the vacuum supply line and replace. Service or expansion is a breeze.

**Note:**

Our kits are fully assembled and ready for installation. We can install a D kit without special tools in less than 3 hours. Refinishing is the hardest part. The independently adjustable pneumatics adapt easily to most any piano or instrument. Some readily available supplies such as glue and PVC pipe and connectors are not included. If you are in a remote area we will supply them for you at a nominal charge.

You may start with a D kit and add extra instruments at any time. Most uprights will accommodate our kits without modification. The tubing of the stack is simple since all the notes are sequential. As for tools, a simple screwdriver, drill and scissors will suffice. The tubing is passed through holes that you drill with a spade bit between the keys at the action breaks in the keyboard.

With our free of charge under the keyboard action contacts you can convert grands, spinets and pump organs. You must specify that you will need these if you do. The complete stack measures about 4 1/2" by 4 1/2" by 45" long.

If your piano has a wire capstan action, please let us know upon ordering and we will include the special action contacts for them as well.

**Warranty Information:** We warranty all our products with no questions asked, replacement or repair of components for 90 days from purchase. Extended warranty coverage is available for all our Pianos and Band Organs. Free replacement or repair, no questions asked! In the event that you drop your instrument into a river (it's happened), we will still replace or repair all the player components without charge. Simply return the damaged components to us with a copy of your warranty receipt. Since our units are shipped all over the world, we cannot come to you but removal and replacement is simple. Usually less than 4 screws for any component. Mark the tubes accordingly.

All Ragtime pneumatics contain their valve and bleed within the unit itself. Just simply mount the pneumatic unit to a piece of 1/2" steel rod and use it to strike or lift anything you wish within the limits of its strength. We have provided you with a convenient 1/8" hole in the end of the bottom for beater rods or under keyboard contacts. 3 holes in the side at various locations are there to mount a spring, a reiterator valve or just to hook them together for more strength. We have provided a lint screen on the top of each valve hole. There is also a rubber bumper that slides in the end of the bottom piece for quiet operation. A slip-on elbow is included with each pneumatic to make tight right turns with the tubing without kinking it. You may leave off the elbow and come out straight if you wish. A 7/16" hose will connect them to their vacuum source or each other. The 5/32" signal tube goes to the corresponding controller or tracker bar tube. You will love the simplicity of this patented device. Use it to operate robots or clocks. Use your imagination!

Some of the advantages of pneumatics are: 1. No contacts to burn out like with solenoids. 2. Air must be available to operate the saxophone, pipes and accordion anyway, so pneumatics make good use of the vacuum available. 3. Pneumatics give a more linear stroke than a solenoid which results in a more human touch. 4. Our MIDI valves work on such a low current that they can even work in the rain for certain projects. 5. Faster and more easily synchronized than solenoids.

We currently stock close to 4,000 MIDI song files for \$3 each. Just call for a list.

## Ragtime MIDI unit specifications

**One definite advantage** to all Ragtime MIDI units is the ability to be in **continuous duty**. Even our basic electronic MIDI valve can be left on for days without overheating. **No other digital acoustic piano can say this.** In fact just a few seconds left on and all the other digital pianos will have to have a new solenoid installed. Ragtime does not use Solenoids to actuate the music. They are linear motors and are designed for continuous duty. For this reason you cannot use MIDI files from the internet with other manufacturers without somehow being sure that none of the notes stay on for more than the manufacturer recommends. Only the **Ragtime digital units are continuous duty**. Also, Ragtime MIDI files will burn up the solenoids of the other manufactures units because of this incompatibility. Do not use Ragtime files with other manufacturers units. We do not use solenoid so you may use any music file with a Ragtime unit. Even Orchestral files written for flute, trombone etc.

M125 - MIDI Trigger Valve - 11 to 13 volts DC. 120 ohm coil (.100amps at 12vdc). - Neodymium rare earth magnet valve

M375 - MIDI pipe valve 11-13 volts DC 46 ohm coil (.240 amps at 12 vdc) - Neodymium rare earth magnet valve

The average song is only about 30KB so a hard drive will hold over 50,000 songs! 1 year replacement warranty. Windows XP operating system. The unit can be unplugged and plugged back in without triggering a system hang-up, it will simply autoscan for errors and start up.

The Pneumatic power system of all our units is an Ametek Lamb standard vacuum motor in a soundproof housing. Runs on 110 /120 volts 50 or 60 cycle. Any Ragtime system with pipes uses a peripheral bypass suction motor (wet dry type). Housed in a sound proof housing with an external cooling fan to keep the air temperature from rising and making the pipes go out of tune. Commercial systems with 24 hour use must have the continuous 20 year life-span brushless motor made by AMETEK LAMB.

**Pneumatic Actions** - Exclusively **patented** Ragtime vacuum operated pneumatics. The relationship of vacuum pneumatics to atmospheric pressure provides a universal constant ideal for synchronization of all actions. Each pneumatic is snapped on to a 1/2" bar. It is **modular** for easy service. Replacement is a snap, but hardly ever necessary. Running on air, there is little wear out. Wear and tear shows up more on the actual musical instruments. After 2 years of 24 hour service, you can expect some wear on the drum heads, piano hammers etc. Replacement will probably not be necessary, but when it is, service is a cinch. We make sure that all components are as easy as possible to get to. All the pneumatics are the same, so you need only a few on hand for the just in case situation.

The Ragtime **MIDI trigger valves are pressed** in as well. Just twist gently and pull. It comes right out for repair or replacement. Connections are with gold plated Milmax connectors. Just push in a 24 gauge wire. Replacement is done without tools but is rarely needed but just in case it is easy to do.

Likely problems? We have seen more damage done by **improper handling** by the cleanup crew than from wear. Make sure that light feather dusters or compressed air are used, not cleaning rags which can snag a wire from it's connection. Guitar pluckers have not been seen to break yet but if they do they are easily replaced in less than 5 minutes since the action actually snaps in. MPEG movies are included on the harddrive for routine maintenance techniques including how to tune a guitar. **The included Intellitouch tuner makes tuning practically automatic.** Just center the meter and it's tuned (average tuning time, 2 minutes). No musical experience is necessary. String replacement is as easy as on a regular guitar, provided it is mounted close to the ground. Some large attractions require ceiling mounted units. For this reason we employ a steel frame behind all guitars which helps to keep them in tune.

**Linking** - Simply run a standard 5 pin DIN cable less than 50' long from one processor to the next. Each unit has a MIDI in and a MIDI out. These are so labeled and use them to link Ragtime units together for greater performances.

**You have two limitations** using our MIDI system.

1. No MIDI cable can be more than 50' long each before it goes into a processor without amplification.
2. No more than 16 processors can be hooked together without a wireless transmitter.

After that there is a geographic limitation. As with all live bands, sound travels about 1200 ft. per second so if two instruments are placed 120 ft. apart and you are standing next to one of them, the sound from the other one will not reach you until about 1/10 of a second later! A flamenco guitarist strumming rapidly strikes about 30 strings a second and you can hear the time between strings. If you plan to have a very large system, the audience must be roughly equal distant from all instruments within 50 ft. or so. A stage wrapping around the audience could lead to physical timing problems due only to the speed of sound. Keep the instruments contained within a 75' radius if possible.

Ragtime Music systems have profound results especially because of the **synchronized instruments**, however the physical limitation of the speed of sound limits the size and placement of the audience. Files can be customized to recognize distance for specialized projects. We have a video tape showing good examples of Instrument placement and instrument combinations. Let us know if you would like one.

Our system controls the lights as well. Each instrument can have a light which is automatically activated when the instrument it points at is played.

## Ragtime MIDI units operating Instructions

First of all, It is not necessary for you know much about the computer except to add new songs from floppy disks or e-mail. Since it comes with many free songs, you may never feel the need.

### Simple operation:

1. Plug the unit into a 110/120 volt 50 or 60 cycle AC power source. If you will operate the unit in a country where 240/250 volt, 50 cycle is the standard you must purchase a drop down transformer providing approximately 10 amps at 110\120 volts AC 50 or 60 cycles at the low side.

2. If you have a coin operated unit, the unit will automatically power up and the computer inside will load all appropriate programs automatically and be ready to accept coins in about 3 minutes. Simply touch the screen for the Music category you want to hear. Select the song and touch pick. The song begins to play.

3. Ragtime coin operated units do not have manual on switches. This helps lengthen the life span since it cannot be accidentally left running. The laptop is always running and turns the motor on when a coin is inserted. The basic motor which powers the unit has an approximate 1,500 hour brush life. It is a readily available motor and can be found in all small cities world wide. Just take it in for brush replacement to any vacuum cleaner repair shop. 1,500 hours seems to last the average family more than 15 years. Coin operated units should see about \$22,500 in revenue at 50 cents per play before needing brushes. Standard (push pull) Coin mechanisms can be set for from 1 to 4 coins to play. Bill acceptors take all denominations from 1 to 20 as well as foreign currency from all countries. The amount of credit per bill is adjustable. Credit card acceptors are available as well. Electronic coin ops are available for multiple coins. Our Software is adjustable for credits to coins ratio. Partial credits are automatically added and subtracted by the software.

### Adding Songs: (This manual assumes that you have a basic understanding of Microsoft Windows.)

1. Place the 3 1/2" 1.44 MB floppy disc containing new songs into the drive bay located in the front of the laptop computer. In guitar, ukulele and banjo units, open the bottom door and the drive bay is just behind the front panel.

2. Place the song files on the C:\ drive. To make this easy we may have placed two shortcuts on the screen. Just tap on Download area and make the screen small by dragging the corner in. Then tap on Upload area and make the screen small. Drag the folder marked Catalog in the download area to the folder displayed in the Upload area. It's that simple. Continuous duty motors are available for an additional charge.

1. Ragtime Guitar, Ukulele, Bass guitar and Banjo require special programming of the song files to play. The unit does not simply operate by notes like the piano. They use fretter and plucker signals which must be coded within the music. You must acquire new guitar song files from us.

2. Ragtime pianos are general MIDI. Simply put, any MIDI song file will play the unit, however the home units which are not coin operated require the manual switch to be turned on if it has one. All Ragtime MIDI units contain an automatic power on relay, but the signal must be present within the song file in order to operate. If you wish to use this feature with songs of your own, you must purchase the Ragtime Coin drop program as well as the Cakewalk 8.0 sequencing program. Then it is a simple keystroke to add the relay signal, and you will not have to turn the unit on manually.

### Diagnostics-

1. Located in **Start/Programs** is a diagnostics program called Octet Designs. This program allows firmware and partition changes if desired and for this requires that both MIDI in and out are connected to the computer. You may need to purchase a 5' long MIDI cable at a local music store to access diagnostics. For the most part, you may never need to. If you do however, then locate the MIDI in port. You can simply follow the parallel cable from the laptop. On the small case attached to the cable you will see MIDI IN. Attach one end of the cable here and attach the other end to the MIDI out port located on the back of the coin operated unit. If you have a piano, you may have to locate the processor and attach the cable there. There will be only one open port. Attach the cable there. The OCTET designs program has a step by step diagnostics if you wish to use it.

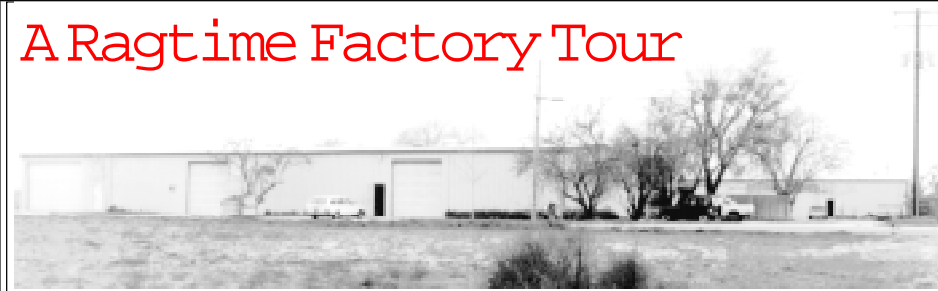

### Backup-

We supply a copy of everything on a CD-ROM.

Warranty limited to one song every 15 minutes, 12 hours per day.

Continuous play requires an additional charge.

Our Main showroom is full of traded in antique oddities

Our Two faced Street Clock Price \$2,400

A Walnut GR Grade 3 Price \$17,000

Traded-in Antiques in our showroom

The Throne Room

SDy-14 g3 cabinet

Roll top front

Option for any of our MIDI units.

This is our Cabinet steel drum unit. It contains a C melody pan, Bass and snare drums, high and low bongos, cymbal with 3 voices, Tambourine, high and low woodblock, castanets, high and low agogo bells, and cowbell. 25 songs included.

Price - \$24,950

These units are now our most popular. They both contains a synthesizer to play the instruments that are not included such as violin, tuba, piano, etc. The blend of 15 live instruments and the synth provides a perfect balance. We were hesitant to add synth until the samplers provided such a rich compliment of instruments. The live instruments are much better, but if you don't have the room, the synth is quite believable when the live instruments are in front of it. Shown here in Oak, but Cherry is also available.

Price - \$950

Amy-7 g2 cabinet

This is our Cabinet accordion unit. It contains a 41 note professional Accordion, Bass and snare drums, high and low bongos, cymbal with 3 voices, Tambourine, high and low woodblock, castanets, high and low agogo bells and cowbell. 25 songs included.

Price - \$24,950

Configuration Screen

What's Playing Game Screen

Karaoke Screen

Karaoke, What's Playing, Band Play Program. Developed by Ragtime to be the best program of it's kind anywhere!

Add \$2,950 for a 12 String Guitar upgrade.

Below is the screen shown with our custom MIDI song Jukebox / Announcer Program. It's intuitive. MIDI or MP3 files organized and played.

MIDI song index catalog available \$10. More than 5,000 songs listed for various instruments.

All songs \$5 each.

All our MIDI units will play together. We have arranged songs with duet features as well as solo. The guitar is available in Steel or Nylon string. These units make serious music. If you haven't heard one you must.

To the right is a photo of our founder Ken Caulkins with noted film director Peter Jackson. Peter recently bought an LB-BGJ for his wife Fran Walsh as a Christmas present in 2002. Peter wanted to meet Ken and have his unit setup by Ken himself. Ken provided Peter's technical assistant a one hour training session on care and maintenance first hand in New Zealand.

As an added bonus, Peter was having the Premier of his movie "The Two Towers" in Wellington and gave Ken and Jamie two tickets to the Gala opening in Auckland, New Zealand. Quite the treat!

"Lord of the Rings" director - Peter Jackson with our founder Ken Caulkins (on the right).

## Model ADESm-14

Peter pointing proudly at his Darling Darling Banjo.

7. Fizz W aller
8. Jelly roll Blues
9. The Last Steam Train
10. We Shall Be Happy

**Ragtime Automated Theater Orchestra Notes:**

You will find a list of percussion instruments on page 43. It is recommended that you have all the instruments listed to achieve the desired results! Versatile, live music. Whenever possible you should have two of each of the melody instruments. Two instruments, properly separated provide a chillingly realistic stereophonic effect. The melody instruments would be Piano, Accordion, Flute (Calliope) pipes, Glockenspiel, Steel Drums, Guitar, Banjo and Saxophone. In a large arena, they should be hung on the walls with duplicate instruments on both sides of the theater. This provides a stunning "Cross Fire" effect. Especially the drums. It is humanly impossible to synchronize these instruments without the MIDI. Two classical guitarists could never pluck the same strings at precisely the same time for the duration of a song. We can! Let your imagination soar!

We also have reserved one MIDI channel with 128 outputs for light control. Light up your orchestra! Call for more info - (209) 735-0767

**Introduction to Ragtime automated products and kits - Please Read**

Ragtime was founded by Ken Caulkins in 1971. The original design was to be electronic with solenoids and an 8 track or cassette player instead of pneumatics and a paper roll. Research soon concluded that the paper roll was definitely more authentic and since the recording industry was ever changing the 8 track or cassette may soon become obsolete. The decision was made to go with authenticity. Paper rolls have been around for a century now and many of the original rolls can still be used, however try to find a place that sells 8 track tape players. It looks as though the decision was a good one. Besides being authentic, paper rolls are interesting. When is the last time anyone you know spent even 1 minute watching a cassette tape go around? People watch the rolls and show their children how the holes in the paper generate a note on the piano. They soon learn that each hole represents a different action. Besides being more interesting they also last longer. Paper rolls have been known to still play after 100 years. Even the best magnetic tape can't say that. Player piano technicians are already familiar with pneumatics and can easily service the authentic mechanisms. All of our band organs use vacuum and pressure to operate the pipes and other instruments anyway, so pneumatics is naturally the best choice.

You could probably count nearly 8,000 Ragtime piano conversions, not including Ragtime band organs if you knew where to look. The problem is they are mostly in private collections. Ragtime has just recently begun doing international shows and expositions. You may start noticing our products in public places. Try Euro-Disney, Hollywood Wax Museums, Ripley's Believe It Or Not Museums, numerous locations in Branson, Las Vegas and Cripple Creek. The Gran Pa Pa chain in Japan now has installed four band organs in four of their stores and have just requested more. You can find our instruments in Guam, Singapore, The Aleutian Islands, The Virgin Islands, Bermuda, England, Ireland, Luxemburg, Denmark, Switzerland, Germany and we have just sold some of our largest units to a new customer in Holland. Watch for our Products at Universal Studios, [Bush Gardens](#), Marine World and numerous antique shops through out the world. We have installed several band organs in commercial carousel operations lately. Boom Town in Nevada, City of St. Catherines in Canada, [Mall of America](#) in Minneapolis and many other Mall carousels display our band organs. The sound is good and the operation authentic. The volume can be turned down to accommodate the mall management. Extended warranties are available, however in private use service may never be needed since the machines are built for constant commercial applications. For this reason you will find that the Ragtime service line is never too busy to answer your call. (209)634-8475 try it! As you can tell from this Catalog, all of our products are of a **unit block** construction. This means that parts replacement is simply a snap! In commercial applications this is important. Down time must be kept to a minimum. A more than 5 minute service problem would be a rare thing indeed.

MIDI has been around long enough now to be considered virtually standard and permanent. For those who long to create their own music for orchestrions or band organs an interface can be purchased which will allow playback, record and composition. Programs are available for the personal computer which can even read sheet music from a scanner. One of the programs for musical composition and MIDI interface refers to the piano roll method of composition. This is where the notes go by like a piano roll and you may edit them in real time or slow it to a crawl. Direct playing of the piano and editing the music for the percussion is available too. In conjunction with Playrite Music Roll Co. we have developed a MIDI interface to the roll perforator. This means that you could send us your **floppy disc** to produce an authentic paper roll from your floppy composition! If you only have the program and not the interface you would need to convert your MIDI file to a paper roll. This system is of particular value to those building unusual instruments of which paper rolls are not yet available. We offer the Jamaican Steel Drum band organ but [Island Music](#) is only available on MIDI. One customer expressed interest in a machine that plays jungle music on hollow logs for his circus act. This is easily done with Ragtime pneumatic products but the operation must have music. MIDI files are a perfect match.

Some Ragtime customers have already added MIDI interface to their band organs and their reasons vary. Some like tapping in to an on-line library of music, while others say it's for the unlimited playing of music from their computer's hard drive. Composition would have to be a good reason for those who are musically inclined. If you desire more information on this subject you will have to call Ken Caulkins on his personal line at (209) 735-0767.

## Roll operated Pneumatic Melody instruments

A204 \$1,900 (Shown unfinished)  
44 note keyboard attachment for all Ragtime Calliopes and Band Organs

A105 \$1,950 MIDI version A105m \$3,950  
Normally shipped with no-bleed pneumatics to tie in with the solo register of the piano.

Please specify your altitude for tuning. Generally speaking it isn't noticeable until you are over 5,000 ft elevation.

A#6 to A8  
A106 \$3,200 A106m \$4,950 (MIDI)  
143 Glockenspiel For Band Organs 27 note E6 to A8

105B- \$1,250 12 Note Glock  
105MB MIDI version \$2,450

A108 \$3,990 MIDI Version \$6,960  
24 note Rosewood reiterating xylophone (24 primary valves (#A163) must be used to work properly) A#5 to A7

A108B 12 note reiterating Rosewood Marimba \$2,160.  
A108MB Midi Version \$2,840

A107 \$2,950 A107m \$3,950 (MIDI)  
24 note Glockenspiel for style 167 A#6 to A8

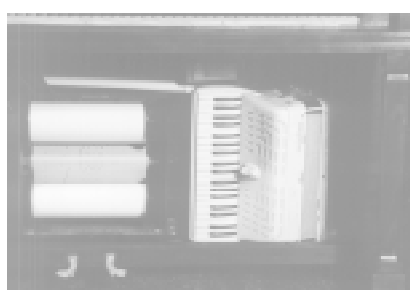

A206 \$2,725 A#4 to A6 A205 \$2,725 A#5 to A7  
24 Note calliope kit- same as A205 but one octave lower than the solo register of the "O" roll system is.

### Note:

In order to insure correct sound generation and pitch stability Ragtime has developed its special brass emulsion coated polymer Calliope pipes. These pipes are used exclusively in all our units. With a small coefficient of expansion you can rest assured the pipes will still be in tune when the temperature changes, unlike other, solid brass pipes that must be maintained at a constant temperature to control the pitch.

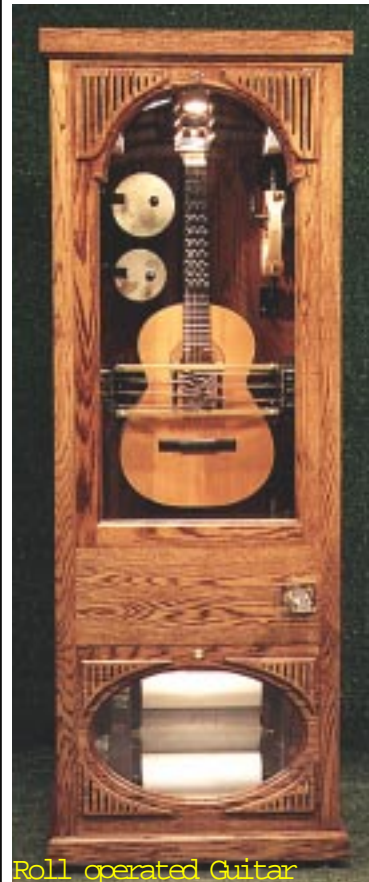

A221 \$4,200 for roll operated version \$5,650 for MIDI version

Player accordion, completely assembled and ready to tube. Add to a regular player piano or nickelodeon. Plays 24 notes on a fine used 41 note accordion, cut-out lock and cancel, vacuum relief and tubing included. Specify for piano or band organ. Band Organ model has 41 playing notes.

Occasionally we have the need to mix and match cabinets. This is a nearly 150 year old English cabinet being fitted onto a 1920 upright piano. Mixing the best and the better.

## Roll operated Classic Guitars and Banjos

Roll operated Guitar

Plays excellent classical guitar with maracas and tambourine. Plays the 10 tune GI roll that automatically rewinds to play again. Dollar bill or coin op acceptor are optional. 2 plays for \$1. Coin op is adjustable for 1 to 4 quarters per play.

Actually playing the guitar! Intellitouch automatic tuner included. Acoustic pickup with special speakers allows the listener maximum quality of sound.

- G Tr-15 - \$17,950
- G Tr-5 - \$16,250
- G Tr- \$15,950

Add \$1,950 for 12 string guitar

78" x 28 x 26 deep

Roll Operated Banjo

Excellent Bluegrass, blues and even classic. Available with the standard 15, 5 or no percussion instruments. Bass drum, Snare Drum, Cymbal, Tambourine, Maracas, High and Low Agogo bells, High and low Woodblocks, High and Low Bongos. Intellitouch tuner included. Provides the atmosphere needed for a western village or country store. 1 roll of music included.

- Jr-15 - \$17,950
- Jr-5 - \$16,250
- Jr- \$15,950

Antique Style Cabinet

Roll operated Spanish Guitar. Includes Maracas and tambourine. 4 roll or guitar music included.

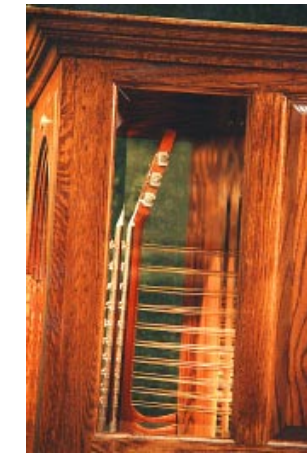

Price - \$17,500

Add \$1,950 for 12 string

Upgrades available  
Deering Ivanhoe - Special engraved gold plated hardware and carved neck. Beautiful mother of pearl work. Call for price.

Made in the U.S.A. by Ragtime  
Patented with other patents pending and applied for.

The above photo shows the brass wires which pull down the fretters to make each note. We don't claim to have invented this fretting mechanism, Encore Banjo Co. did it for us around 1903. Many patents were received by the Auto-Manufacturing Co. of Boston, Massachusetts. Web of course have several patents ourselves, but not on the fretters.

Ragtime was asked to duplicate this instrument in 1978 by an amusement park rep. in Southern Ga for their Bear Country. The difficulty of arranging music on paper rolls was a setback, but the project was still on our drawing board. Computers changed all that. Now a simple program we developed can modify music so that it can control a guitar or banjo with the correct timing. One of our nickelodeons is still in use at Euro Disney.

Guiro (super size)

High and Low agogo bells

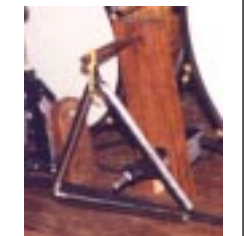

Vibra slap

Standard Molex connectors used on all our MIDI instruments.

14" and 15" Tinbales - clear skin with tom tom beaters added.

Triangle

"Kettle Drums" General MIDI 2, 4 or 6 piece sets

### Fog Machine

Is operated manually or automatically by a MIDI signal from the song. Lets fog rain down on the strobe lights. Excellent effect.

\$299 installed

Rope lights - Many colors available \$25 each up to 2 ft long. 12 volt transformer included with each one.

F5-BRW 125 Flashing Strobelights blue-red-white

Will attach to all instruments and flash when they play. 18 ma, 12 volt. You may have up to 10 lights on each MIDI note which you may want on some of the drum instruments. Price each: \$25.00

6 Cymbal Tree 10 voices - 20" Ride, 16" Crash, 12" Splash, 12" Chinese and 12" closed high hat. Other voices produced with appropriate beaters.

The top lifts up for storage. Solid Oak, Walnut or Mahogany. Claw and glass ball feet. Looks great. American made by Ragtime.

A126 \$750  
RAM 2 Bench

A127 \$900  
Victorian Bench

A200 \$600 with top plate  
A201 \$525 No top plate

Makes Calliope construction a breeze. Just install pipes and valves and build some type of cabinet around it!

Shown here is happy customer Larry Beman with his recently "modified" Coinola X orchestra. Now he can enjoy a virtually unlimited supply of tunes with MIDI. Larry enjoys surfing the internet for new arrangements. We have a video of this machine playing by MIDI, or call Larry and ask him to play it over the phone! We had to design hardware to isolate his rosewood xylophone from the stack so that it could be played independently with MIDI. The isolation feature had to be able to shut off when the 0 roll is used.

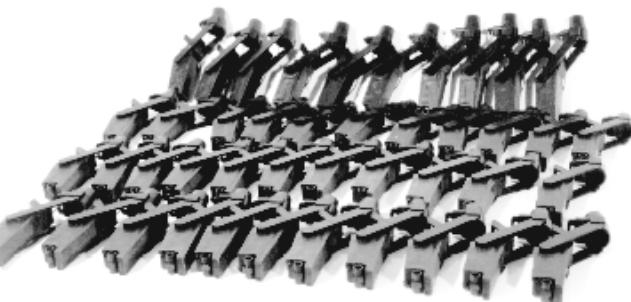

Antique Orchestra to MIDI

MIDI kit price - \$6,650 Daisy chains to all Ragtime MIDI products! Easily Convert any piano to MIDI pneumatic operation. Contains 78 pneumatics with MIDI valves, 1 vacuum motor, MIDI processor and wire.

A118S Silent vacuum motor for MIDI piano, guitar, etc. Add outout #A175 for Roll operation. 9 3/4" High, 7 3/4" deep and 8 3/4" wide. 9 lbs. Price- \$640

MIDI controller with lyrics display. 20,000 song capacity with lyrics. Coin Comparator standard. Bill acceptor available. Plays MP3 as well. Price - \$3,950

A125 \$2,575 full set of 43 pneumatic pipe valves for a calliope or Band Organ

A125b \$85 Single pneumatic pipe valve

A199 \$862

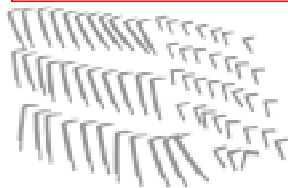

Model 42 cabinet, comes knocked down and unfinished with chest and top plate.

A119S

Silent and cool Pressure/Vacuum motor for MIDI calliopes. Add outout #A175 for Roll operation. 12"H x 13 1/2" Deep x 9 1/2" wide. 11 lbs. Cooling fan on back. Price - \$790

Everything is Modular and Parts are Unit block and Interchangeable!

A214a \$66 per set Grand or Spinet under keyboard contacts.

A153 \$120 ea. RAM 2 column cap

A214 \$66

Wire Action Pegs. 33 short ones for bottom pneumatic tier, 33 long ones for top. Rarely needed. We will include these with your kit if you request it.

# Melody and Accompaniment

Steel Drum Lead Pan C5 to B6

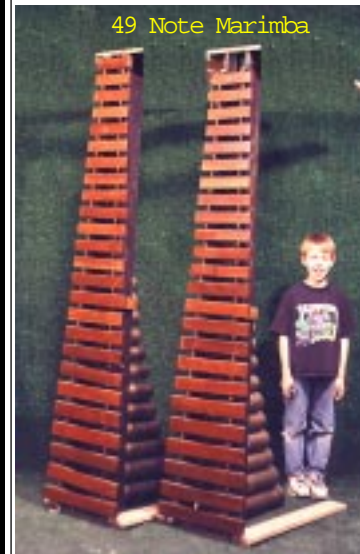

10 Piece Steel Drum Band

41 note accordion - MIDI

Big Bertha

49 Note Marimba

Oak - \$17,950  
Walnut Laptop

Model B

This MIDI controlled Bass guitar will simply plug into any of our MIDI operated instruments. No laptop included or needed. It is not a solo instrument. Really puts out the bass. Amplifier and speaker included.

Available in matching cabinets for all our instruments. Oak, painted or no cabinet, just mount to a wall.

Instruments are mounted to a board with actuating pneumatics in back for public display. Any angle, any configuration. One large application for a casino has requested more than 6 guitars mounted in bronze statues of musicians! All instruments are mounted for easy access. Let your imagination soar!

All our coin operated MIDI units contain a laptop computer, which is isolated inside. To operate, the customer simply touches a scroll button provided on the front. This highlights a selection as he scrolls. When a desired song is reached, the customer simply inserts the preset amount of money to hear the song play.

Instructions scroll across the screen after 5 minutes of inactivity.

D42rm

Price - \$27,450

D42rm-A

With Accordion added- \$32,950

D42rm-ABK

Price - 35,400

With Accordion, Glockenspiel (in the back) and Bass added

Two sided! Something happening all the way around. Great for Parade Vehicles.

Our 43 note calliope with Bass Drum, Share Drum, Cymbal and Tambourine. Touch screen standard, bill acceptor is extra. New songs can be emailed to you. 25 songs included.

Wood frame glass cover available to quiet loud calliopes for indoor use. Price - \$695

MIDI song index catalog available \$10. More than 5,000 songs listed for various instruments. All songs \$10 each.

This is our best value for a little band organ. It really sounds correct. Call for a demonstration CD.

Available voiced for loud playing or indoors. Please specify.

### MIDI upgrades

Upgrade from laptop or slave PC and 10" touch screen \$3,500  
Upgrade to 15" Monitor and touchscreen - \$1,000  
Software upgrade \$10 per song or \$5,000 for all.  
MIDI valve upgrade - \$20 each Pneumatics \$50 (complete sets)

## Grand Pianos, Popcorn Machines and More

Custom made to fit your needs. Rub back bars of musical instruments actually playing. If you've heard our unit in action, you don't need an explanation. If you haven't heard, then you must just try and imagine a big band or latin band without the cigarette breaks. Absolutely the latest for the new millenium! Just hand someone a microphone for an instant stage show! Stages constructed with runways and PA system.

**Please Note:**

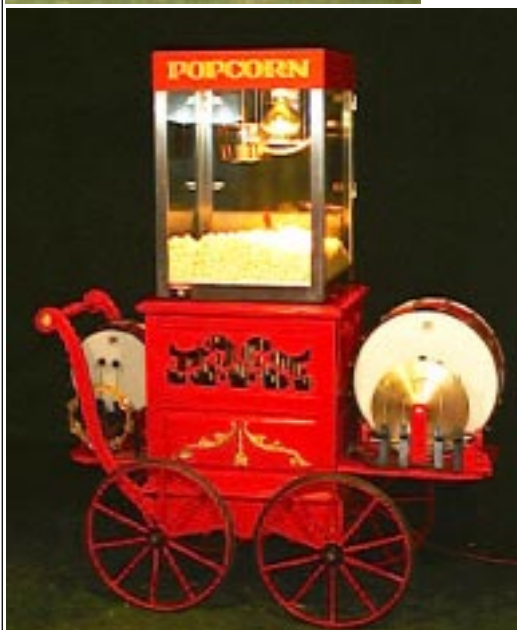

Here at Ragtime Automated Music we have been striving for 29 years to bring back live music to amusement parks, theaters and restaurants. Since there is always a shortage of good dependable musicians we are filling a void, **not replacing humans**.

Baby Grand Piano MIDI operated.

Consists of 5' grand piano circa 1920 rebuilt to withstand the constant use for which you intend it. Interfaces with all our MIDI acoustic products as well as a synthesizer. No appreciable lag time like other MIDI grands due to pneumatic rather than solenoid actuation! Stand alone operation or chaisy chain to our guitar, flute, Castaway band or ? Larger grands available at an additional charge.

Price - \$29,700

**Note:** This catalog contains mostly products we stock ready to ship. We also have special oversized instruments such as 28" Marching bass drums, 64 note resonating marimbas, vibraphones, concert grands, tuned sleighbells, chimes, bells, whistles, celestial harp, harp and Foley effects. Smoke and lighting effects and much more **CALL to discuss your ideas**. We simply cannot put everything in this catalog.

### A Musical Popcorn Machine

This is our little calliope/popcorn machine. Pops 8 oz. of corn. Musical Calliope attracts children of all ages as it plays Entrance of the Gladiators or Blue Danube Waltz. Popcorn attachments available for most units. General MIDI operation. Ready to play. Hundreds of songs included. Rubber tires and cart included. Ready to roll. Larger units available. Price - \$18,950

Don't hesitate to call us concerning your ideas. On site warranty or on site training of your staff will make your orchestra last for decades. Pianos, guitars and banjos are tuned as you normally would. An auto tuner for the guitar is available if you don't have anyone on your staff willing to do it. Step by step instructions and a guitar tuning meter make the job easy as pie. (209) 735-0767

W31-3 Price - \$7,950

Bass, Snare, Triangle, Cymbal and Castanets

With the orchestration of a full 31 pipe band organ, but enclosed, you can play it indoors without being too loud. If you want loudness just open the locking front panel. The top is flat and can be used to display other antiques. The 5 tapered glass panels provide sound dampening when you need it. Coin operation or free play is standard. Comes with 3-0" rolls. 25 cent coin operation is standard. Weighs about 200 lbs. 46 inches wide, 35 inches high and 23 inches deep.

Resonating chambers give the drums a superb tone. Comes with an O roll spool frame, Bass and Snare drums, Tambourine, 31 pipes. Ready to play. Kit form available above.

## Ragtime Stage Productions

Automated Acoustic musical instruments for Stage Shows, Theaters and Theme Parks

BW66m-bDCK-7

BW66r (less inverter, battery and horse)  
price - \$16,900 roll operated

This wonderful bandwagon is built to accommodate a large 12 volt battery for about 6 hours continuous play. The O roll loads in the front under the seat. Contains Bass drum, Snare drum, Tambourine, Triangle, Cymbal, Woodblock and 66 pipes - for that harmonious Fairground Organ sound. Metal wheels are rugged for parade use. Pull with an animal or by yourself.

Price - \$29,900  
50 songs included free-

Parade Vehicles

Let us build you a special parade vehicle using any of our acoustic instruments for a real "Band Wagon". Prices will vary, call for a quotation. Allow up to 6 months for delivery. Great for parades, picnics or just plain fun.

Price on antique truck - \$88,000

The works \$29,500

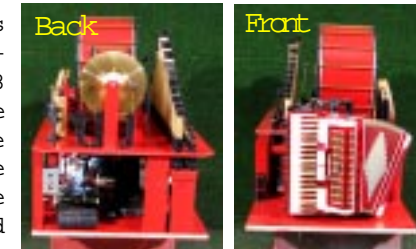

BW38-AbCDk-5 Left side

BW38-AbCDk-5

Right Side

This is now our most popular Band Organ. It provides MIDI compatibility with the original arrangements of antique Carousel Organs. Really a nice unit. It contains 38 Calliope pipes, Bass Synth, 12 glockenspiel bars, 41 note Accordion, Bass Drum, Snare Drum, Tambourine, Triangle and Cymbal. The 12 note Glock actually provides more action than the 24 note since we reroute all the notes to the upper 12 bars. Then they are playing twice as often and the higher notes are more delightful and the cost is less! Fantastic music.

Back

Front

This is similar to the BW66 but has 38 pipes, 12 glock notes. All notes are played. Contains 41 note accordion, Bass and Snare Drums, triangle, woodblock, tambourine.

Price without case or wheels: \$19,500

Price Complete- \$32,650

Complete with chassis and MIDI player: Price \$34,500

Wagon frame with Metalwheels-\$2,750  
Rubber Tires add- \$400

Case alone-\$1,900

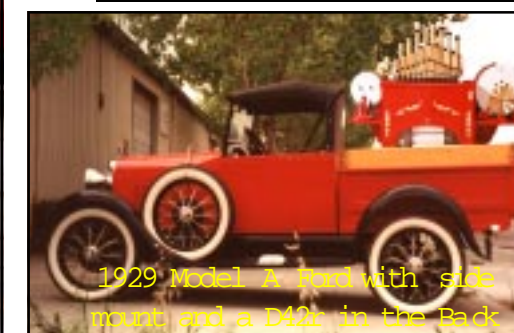

Piano Synth or General Synth available for an additional \$2,500 all models.

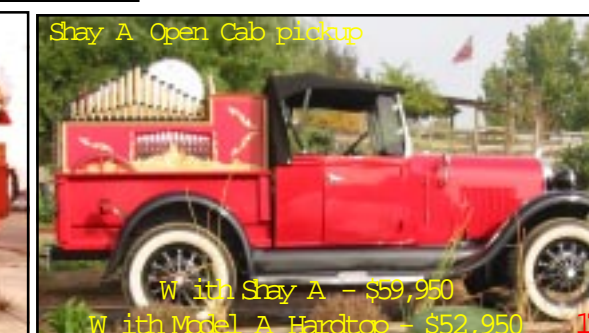

BW66m-AbDCK-7 Left Side

BW66m-AbDCK-7  
With Accordion-  
price \$37,950

1929 Model A Ford with side mount and a D42k in the Back

Shay A Open Cab pickup

With Shay A - \$59,950  
With Model A Hardtop - \$52,950

## Antique Pianos Converted to MIDI

Restored to Perfection and then converted to MIDI for that traditional mellow tone.

Touch screen control provides easy interaction between the up to 5,000 songs on the hard drive. Contains 7 percussion instruments as well as piano. Cymbal with 3 voices (Crash, Ride and Splash), Tambourine, Maraca, Snare Drum and Bass Drum. Coin op or Bill acceptor is available for an extra charge. Select songs from 10 separate categories. Scroll through alphabetically. Simple to use. All coin features are logged and adjustable. Price - \$21,900

Also our P-7 - grade 1 cabinet with no PC or touch screen - \$19,000 Add \$1,950 for full expression (EP-7) (Song files coded with expression carry the letter E after the instrument suffix)

All our MIDI units and kits will come with 25 free songs on the hard drive. If you need us to place your selections on a floppy disc for you the charge is \$10

per selection and up to 24 selections on a disc with a 10 selection minimum as long as we have it. Arranging price is \$25 per song if we do not. Allow two weeks delivery either way. If the custom song is foreign to the U.S.A. please include the English title as well as the other language title. If you have the sheet music, please include a copy as well as a recording if you have it. **Add \$2,500 for Synth and with Surround sound**

You can use any inexpensive synthesizer with a MIDI output to record on our MIDI data recorder and then play back on the nickelodeon or other unit. Also, you can play any of our units from a remote keyboard with MIDI Out and a long two wire MIDI cable! Create a magic piano or calliope with a huge data base of MIDI files. Play any selection requested from your data base or use the keyboard if you have a pianist handy! Great fun. Put a calliope 20 feet up in a crows nest and play it from a hidden room.

Add smoke to our air calliope to simulate the mist of a steam calliope. Stroke machines are available from us. All our units are authentic acoustic instruments! No electronic synthesis! Everyone can tell the difference because it's live.

We strive to produce public domain software in our music files. If you believe we are producing a song title that is currently copyrighted, please let us know right away.

### Morena Special - \$26,950

This special cabinet is influenced by European design in response to requests from there. This same cabinet style is available for the Gtb as well. 78" x 38" x 24" deep

### MIDI Version

\$31,950

In Cherry

**Note:** Expression is accomplished by moving all intensity and volume events to 4 midi notes as shown on page 26. They are Bypass vacuum regulator, soft pedal, spill valve and sustain pedal. These all work in concert for tremendous and constant control of our different instruments, individually.

Style P-m contains MIDI Piano only. Shown here with top and bottom panels of f

MIDI kit Price - \$7,650

Easily Convert any piano to MIDI pneumatic operation. Contains 78 pneumatics with MIDI valves, 1 vacuum motor, MIDI processor and wire. For any upright piano.

Place on location for coin op. Great for game rooms, hotel lobbies, gift stores, family rooms.

**A208 \$1,800**  
ST kit Add on  
Contains 18" Bass Drum, 12" Snare Drum, 8" Tambourine, 25 cent coin op with Solid Brass Coin plate and Coin cup, extra tubing, screws and t's as needed. Everything to make a D kit into an ST kit.

**A114**  
Triangle \$275

**A115**  
Indian woodblock \$275

**A210 \$800**  
H kit add on

**A113**  
Tambourine \$275

**A112**  
12" Snare \$500  
Ring set -\$125

**A189 \$30**  
Solid brass coin plate  
3"x 1-3/4" x 1/4"

**A155f \$150**  
Soft of Loud pedal pneumatic with valve.

**A188 \$69**  
Coin cup, special design curves around hammers for spaced consideration.

**A104 "O" roll frame \$1,450** With core trade in \$899  
Complete with tracker bar, lock and cancel. Adjustable voltage regulator keeps your desired tempo constant.

**A109 18" Bass Drum and Beaters (for piano) \$750**  
**A111**  
12" Snare Drum and Beaters (for piano) \$550

**A209 \$2,250** GR Kit add On

Set of 24 pneumatics alone-\$1,740

Contains everything to make an ST kit into a GR kit. Has a 24 note metal Glockenspiel, 12" Rythym Cymbal with mounting bracket for on top of Glock, extra tubing, screws and T's as necessary. Rebuild kit for Glock - \$1,200 plus labor

12 note glock \$1,400 for 54 note O roll orchestrians

**A116**  
Rythym Cymbal \$275

**A117**  
Pneumatic Pipe Valve only Price - \$39.50

**A162 \$127**  
Pipe, valve and pneumatic, over piano stack version

**A162 \$127**  
Pipe, Valve and pneumatic, calliope version.

**A103 \$2,850** Rep.Stack for Ragtime Pianos, 54 notes.  
**A102 \$3,200** Replacement Stack (66 notes)  
**A102b \$3,750** Replacement 78 note stack

Replaces old player piano and nickelodeon stacks where rebuilding is not practical. Will work great with our suction motor and most pedal pumps. Complete with Stack bar ends, stack connectors, screws, 85 pneumatics and 85 elbows.

**Honky Tonk Attachment Kit**  
Uninstalled for 66 key orchestrian  
Price - \$450 with Lock and Cancel, cloth, clips and framework.  
**Honky Tonk Attachment Installed Price - \$650**

## Automated Accordions

Roll Operated 41 note Accordion on a Wine Barrel.

Coin operated and Plays 0 rolls.

16" x 9" x 24" high Weight - 10 pounds  
SE-1 \$229.95 ABS  
\$249.95 Wood  
6" x 10" x 14" high weight - 3 pounds  
DC-4 Pneumatic Duck Call (not shown) \$199.95  
6" x 10" x 14" high weight - 3 pounds

RT-14 Grade 3 Cabinet

Piano with Banjo and drums! \$46,950

## New View!

Built of 5/8" Plexiglass this BGT-14 shows all! Built by special request for the San Jose Tech Museum this unit has clear pneumatics showing the valves in operation. It also has as a clear front on the guitar to reveal the interior structure of the guitar. Each MIDI valve is fitted with a red LED that lights up when it is in use. The guitar and the banjo have a bright light inside that comes on when the instrument is called for.

Price in Clear - \$84,950

Ukulele

For the sound of the Islands. Used for traditional Hawaiian music. The Upi shakers are addressed by the maraca signal in general MIDI. Laptop included with 25 Hawaiian songs.  
MIDI Ukulele Price - \$21,950

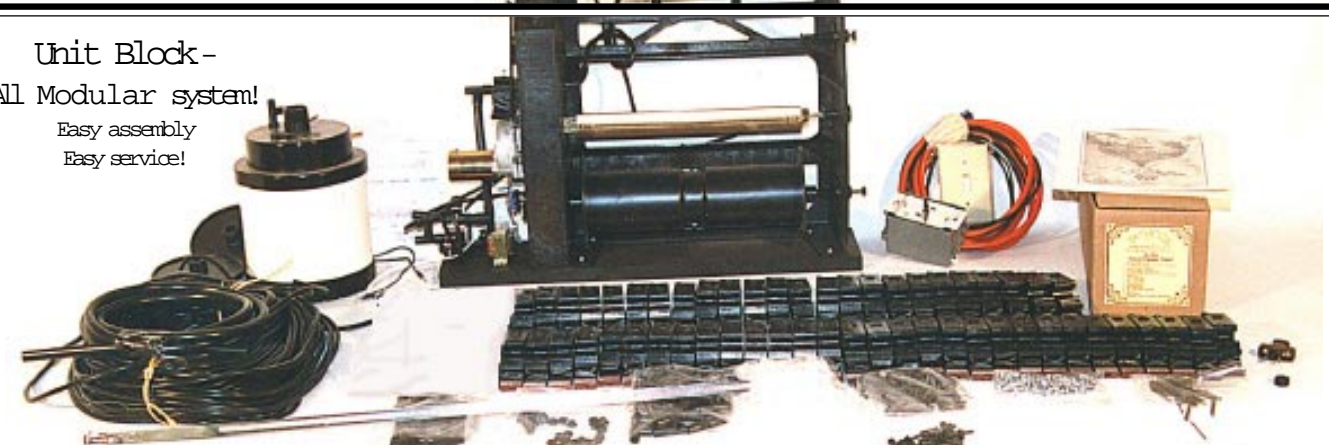

All Ragtime Automated Stringed instruments are available for stage mounting as well. For simplicity, they are shown here as complete and stand alone instruments with a cabinet and coin op. If you are planning a musical attraction feel free to ask for the "foot print" that each instrument makes in a free form display.

| 54 action contacts                          | 1 "0" roll test roll with first order        |

Convert any upright piano or ex-player piano into a player piano or nickelodeon! Easiest thing you'll ever do with a piano. With a little ingenuity convert spinets, Grand pianos, pump organs or ? Add double bass or double treble for \$804 each.

**Specifications and notes**

Single piano pneumatic size: 4.5" long, 1" wide and 1.25" high  
 54 note nickelodeon stack assembled size: 32" long, 5" deep and 4" high  
 Lowest working vacuum: 8" of water (Negative air)  
 Maximum working pressure: 28" water  
 105-120 volt AC 50 or 60 cycle  
 Both spoolframe and Suction motor are brush type and insensitive to cycles.  
 Total power 4 amps, power to spoolframe is transformed to 18 volts regulated DC and tempo adjustable  
 All kits and parts are in stock and ready to ship. Automated assembly is used for quality and price control when ever possible.  
 Fully patented systems  
 Nearly 1/2 million pneumatic units made by Ragtime since 1971.  
 Current ST kit installation time by factory trained personnel: 2 hours 46 minutes. No errors.  
 Extra instruments help customers justify trading in that old player piano or Steinway upright. Extra instruments provide you with greater profit.  
 Only basic tools needed for conversion. Screwdriver, electric drill with hole saw and hammer.  
 Complete instructional video comes with first order, along with a special contact installation tool and test roll.  
 Change old wooden pedal brackets to 7/16" steel rod and use our player pedals to lower pedal hardware for spoolframe and drum installation.  
 All parts carry traditional 90 day free replacement guarantee, even if you break them.  
 Technical service line . Talk directly to factory personnel for assembly tips and any questions you may have concerning our kits. Refer to Catalog inside front cover for phone numbers.

The 54 note stack included sounds great as it is, but for those who want a little more oomph we offer a double bass kit and an octave higher kit.	Double bass kit: \$870 12 no bleed pneumatics. Extra treble kit: \$870 12 bleed pneumatics.
---	--

ST kit being installed  
Note ease of stack and roll frame placement and that the drums and tambourine fit without any modification of the cabinet!

I cannot over state the simplicity of installation! We have documented cases of a 14 year old boy installing one of our kits in one day without referring to the manual proving that it is indeed intuitive!

Below is an example of an underkey pneumatic action installed. Fits in any spinet, console, grand or upright.

## Piano Conversion Kit Options

Pneumatic stack shown here installed in an upright piano.

This photo shows the ease of the Ragtime adaptable pneumatic system. Our MIDI valves run piggy back just at the "back" of each pneumatic. This little "MIDI trigger valve" makes it possible for the life-like performance of our digital orchestras. The pneumatic has a linear power stroke, making a more natural movement than a solenoid. The Ragtime MIDI valve is actually a linear "Motor Valve". Both being linear, it is a good match as your ears will tell you.

Under the keyboard mounting is more difficult, but necessary in Grand Pianos, spinets and some early antique pianos. We supply push rods upon request with each kit or replacement stack.

Convert any Piano to an automated musical instrument.

Retail Price \$4,750 Installation \$500  
Transportation add \$1.25 per mile or save by bringing your piano to us.

Replace any old player piano pneumatic stack in a fraction of the time it takes to rebuild it. Some old players such as Gulbransen or Angelus are difficult if not impossible to restore. Just replace the stack!

MIDI ready computer ready to use with 100 songs included \$1,995, and the hard drive will hold 50,000 songs! Can be coin operated.

Shown is an antique piano with the MIDI pneumatic stack installed above the keyboard. You can use a new piano or even a grand if you like. Note ribbon cable on the left.

### Ragtime Kits installed in Antique upright pianos

Open view of a Ragtime Style GR piano containing 6 instruments - Bass drum, Snare drum, Tambourine, Cymbal, 24 note Glockenspiel and Piano. Coin operated or free play the O roll is standard.

An open view of a Ragtime Accordion piano. The accordion can accompany any of the Ragtime Band Organs or Nickelodeons. Excellent for Italian songs and all others as well.

Under Keyboard Installation

For grand pianos, spinet pianos, one piece fallboard antiques with limited space above the keyboard, wire and peg actions and most new pianos.

Works well, allowing rapid and direct blow characteristics. Takes a couple hours longer than the above the keyboard mounting shown above. Ask for under key push rods when ordering your kit or stack. There is no additional charge.

MIDI kit ( piano conversion kit only, computer needed, sequencer extra)  
Retail Price \$3,000

	125					Consulting/Shop fee per hour - travel time, training and music arranging techniques.
	5,645					Set of 15 drums for drum reassignment technique. See list on page 24

25 Key Accordion

These are ready to play, but uninstalled prices. To figure the approximate charge for installation, setup, frame mounting, connecting, arranging music, programming the processors, configuring, and wiring just add 20% to the cost of each item for standard chassis mount, except the pianos. Extra charge for special stage requirements. If you choose to use your own staff, there may be a consultation fee of 9% or so. Warranty includes up to 1 song every 15 min at 12 hours per day. No discounts on custom installations. Add 50% for mounting on rocks or uneven surfaces. 21.

Welcome to MIDI.

Musical Instrument Digital Interface. You can improve the response of your instrument as well as the selection of songs with MIDI. The paper roll slides over the tracker bar hole gradually until the incoming air overcomes the bleed of the pouch. This is somewhere around 1/3 open. The pneumatic responds and then the hole gradually becomes covered again until the bleed takes charge and the pneumatic is "switched off". With our MIDI valves, a very small electric signal of 12 volts causes the valve to open immediately and overcomes the bleed. Even marginal pneumatics find new life when the air signal is so close to the valve. Eliminate line resistance almost entirely by mounting the MIDI valve against the valve chest of your instrument. Since our MIDI valves are installed with a simple T connector, there is no intrusion. Installation is fast and simple. Our signal processor includes a pre numbered soldering strip to keep your signals in order. Simply cut the rubber tubing near the primary valve and insert our T and attach the MIDI valve to it. When the roll is stopped between songs and the tracker bar is near the MIDI valve can take control. When the current is off the valve is closed as the magnet valve is attracted to its iron seat. The MIDI cable is about the size of a telephone cord with only 2 wires doing the work. You can run it for up to 50 feet between processors and up to 16 processors without the wireless system installed.

**Theory of MIDI valve operation -**

Our valves are currently produced in 2 sizes. 1/8 inch for player pianos, nickelodeons and small band organs and 3/8" for any pipe or large book organs. All valves work on the same principal. A permanent magnet is attracted to the hollow iron valve seat. This insures closure when the power is off. Synthetic rubber between the magnet and the valve seat provides quiet operation, as well as good sealing properties. A coil wrapped around the hollow iron core/valve seat repels the magnet from its seat when energized. 120 ohm for the 1/8" and 50 ohm for the 3/8". Using Ohm's law at 12 volts that is about .100 and .240 amps each respectfully.

**Computer Interface -**

In order to operate, each MIDI valve must be connected to an output board of a signal processor which will provide the 12 volts at the appropriate time. This is like tubing a player piano tracker bar. Simply start at the left side of the pneumatic stack and attach to the left side of the processor board. Check the numbers against the MIDI map provided and start to solder. Once you have finished the wiring you may hook the terminal strip to the processor. Then the processor is hooked via the 2 wires in the MIDI cable to a computer or MIDI data player. On a computer it simply goes to the MIDI out of your sound card. The MIDI player operates like a tape deck. Forward, rewind, select. Software such as Cakewalk makes rearranging music a breeze for anyone who cares to try. You may download files from the internet and play them directly on our MIDI instruments. Some channel arranging may be necessary. Channel maps are included in this booklet.

**MIDI Valve Description of Application**

MIDI- (Musical Instrument Digital Interface) MIDI allows a computer to interface with a synthesizer or in this case acoustical instruments. Very simple to operate - just scroll through the songs and press select. In our coin operated versions a coin must be deposited before the selection is played. 20,000 songs may be stored on the hard drive version. We have several patents on our player system and the patent on our MIDI valves is still pending. Both valves are made in our California facility. The MIDI valves are not solenoids. Rather they are small linear motor valves. No contacts to corrode or become dirty. This is a fail safe system. Expression is accomplished in our large orchestra versions by varying the amount of instruments and notes being played. This is very effective, much like a marching band accomplishes. By using pulse width modulation, full expression can be accomplished for classical piano pieces.

Our 128 output processors are programmable. Ribbon cables connect the processor to a numbered terminal strip for soldering. 16 channels and 16 partitions allow complete flexibility. In a chain of 16 processors each processor is numbered and can be reprogrammed independently of the others even within the daisy chain.

**MIDI valve and brackets**

Specially designed MIDI valve brackets hold MIDI valve and position them so that they are never too close together. The magnets must be 1" apart to keep from interfering with each other. These brackets also furnish a neat mounting configuration. We find that they mount nicely on the stack cover just under the spool frame in most players. They are less than 1" tall when assembled. Two rows provides 1/2" between valves. The same as piano keys. Price \$35 ea.

24 output MIDI signal decoder and processor. Converts MIDI signals to an on-off 12 volt DC current. 16 channels, software included. Easy to use. Price - \$195 each. (not pictured)

M-125 MIDI valve  
Will Convert any existing player piano to MIDI. Weather resistant for outdoor applications. 145 ohms or about 85 ma @ 12Vdc Actual Size. \$32 ea. (T included)

M-125G MIDI valve  
High performance, passes 4 times as much air as the M-125. Same appearance. \$41

M-125 MIDI valve  
Without bracket  
Price \$32

In line MIDI valves

M-375 MIDI pipe valve.  
Convert any pipe to MIDI, even book organs. May be used for a small MIDI operated water fountain using low pressure. 46 ohms or 240 ma @ 12Vdc \$45 ea

Shown with mounting bracket. \$5 each

**AR31d-7 Carousel Organ - Price \$49,600**

ARW31-7 - The Works only, chassis mounted Price - \$39,600 Cabinet Only \$2,900

With nearly 40 years experience in producing quality Nickelodeons, Calliope and Band Organs we give you this extraordinary machine! Relatively small in stature in measures a mere 46" wide, 24" deep and 6'7" high and weighing about 300 lbs. If you have heard it, you know that there is no doubt left in your mind that a carousel must be close by. The 24 wooden reed pipes are authentic in construction. The 27 note glockenspiel provides that familiar ring. The 31 Calliope pipes match exactly the sound of a Magic Flute and the 41 note accordion adds bass and texture to the music and since it actually squeezes in and out it adds animation too. Our large 18" bass drum and 12" snare provide rhythm while the tambourine and cymbal keep time. To finish off a musical passage the triangle is always there while the castanets add charm. You may select the rank of reeds from the

accordion to add more bass or treble. The doors on the top and bottom open to voice the instrument to your liking- from quiet to boisterous. All our instruments play 15 tune "O" rolls

that rewind to play again, over 4,000 songs available. As you can see from the photo above, the front of the cabinet comes off after removing 6 screws in the back. This allows immediate and easy access to all components for any future adjustment. We have especially considered the technician in its construction, a rare event these days. All components are modular and easy to exchange or add. Simply unplug and replace. The irony is that failure of our components is rare indeed but we have provided this feature anyway.

Send \$8.95 for a 1 hour cassette of AR31d-7 and A31d-3 playing various selections with no narration. Many listeners invariably say it sounds like a European band organ, all say it sounds like a carousel organ! Judge for yourself, order a demo tape now or call for a telephone demonstration. Perhaps you will want our reiterating glockenspiel to match that particular band organ sound that you are looking for. The Cabinet is solid Oak and can be ordered with light medium or dark Oak stain. The drums are mounted on a removable shelf (2 screws) making it easy to go through any doorway. Four heavy duty rubber casters on the bottom make moving a breeze. The 25 cent coin op is operational. You may order the works (ARW31-7 as pictured above) for \$19,000 and build your own cabinet.

This model is also available in a fully enclosed commercial unit (drums too) with sliding glass doors for volume control, vandal proof wire mesh over the openings and a dollar bill acceptor for \$1 a play. Call for photo.

**Popcorn Machines**

Model PA31dg-3

Animated Popcorn popper and dispenser. 10 ft. 6 inches tall! A real crowd pleaser. Contains 31 Calliope pipes, 41 note Accordion, Bass and Snare Drums, Cymbal, Tambourine, dollar bill acceptor and coin op. Storage in back. Weight 300 lbs. Usually found in large open areas such as game rooms, casinos and restaurants.

Price - \$54,800

Model 143-7  
Wooden wagon wheels can be attached to any of our units for rough terrain movement. Instrumentation as shown.

**The Ragtime Animated Calliope Popcorn Vendor**

Just deposit 25 cents to start the air calliope playing. A dollar bill can be inserted in any direction for 1 1/2 oz. of popcorn. The clown pumps up the Antique truck tire while the machine is vending. The Cretors 8 oz. kettle will make about 160 oz. of popcorn per hour. The vending rack holds 15 boxes with extra storage in the top. The air calliope plays standard 10 or 15 tune "O" rolls that rewind to play again. More than 4,000 songs currently available. The one shown (P31r-3) contains Bass Drum, Snare Drum, Tambourine, 31 pipe Calliope and coin op. Approximate weight - 300 pounds. Height 72", width 48" and the depth is 24". Shipped with 3 rolls of music.

P31r-3 in Oak \$42,800 in Red \$41,800

**Model A31c-5-Compact Accordion/Calliope band Organ**

Add the accordion to the Calliope and Glockenspiel for Music! Music! Music! We are experiencing standing ovations at all exhibitions. The Accordion squeezes by itself as the songs unfold. The transition between Accordion and Calliope is virtually unnoticeable as the two blend together. Contains 41 note Accordion, 24 note Glockenspiel, 31 Calliope pipes (Piccolo), Snare and Bass Drums, Tambourine, Cymbal and 25 Cent Coin mech. The center panels remove for outdoor exhibitions. With the doors closed it is suitable for indoors as well. Measures 6' 6" high, 25" deep, 37" wide. Weight - about 250 pounds. Plays "O" rolls. Push pull coin op, 1 to 4 quarters selectable.

**Model A31-6**

**Price \$39,900**

The same instrumentation as the A31c-7 less the Glock. Without the doors this model is very loud and the cabinet is larger. 7'2" tall, 23" deep and 48" wide. With the Drums on top.

**Price \$29,900**

**143m Band Organ**

MIDI controlled with laptop and Ragtime MIDI software. Great for small carousel. Contains Glock, Accordion, 38 pipes, Bass drum, Snare drum, triangle, tambourine and Cymbal.

**Price - \$33,900**

**Model 143dg**

A Fabulous Band Organ containing 8 automatically playing instruments. Bass and Snare Drums with brass hardware, Cymbal, Tambourine, Triangle, Castanets, 27 note Glockenspiel and 43 Calliope pipes. Playing on air using a special quiet 110 VAC compressor and vacuum pump, it is built for commercial use. Coin operated or free play it may bring tears to your eyes. 43" wide, 23 inches deep and 7'2" high weighing under 250 pounds. The bifolding doors allow a good volume control for the pipes for indoor use. All instruments have individual volume control as well for balancing. The stained glass sides are augmented by 4 beveled glass windows in the doors. Great for any occasion.

**Price : \$29,500**

Kit, less cabinet \$8,500 Unfinished Cabinet with 2 stained glass panels with 4 beveled glass panels as shown - \$2,900

Over 44 years of producing Automatic musical instruments have given Ragtime an unshakable reputation for Quality.

Note: The above model is available with an added rank of our reed pipes for an additional \$2,000. Excellent!

Note the Oak Drums with solid brass hardware and the Jewels mounted in the beautiful stained glass windows.

All Calliope Pipe models are the same price in MIDI but come without the sequencer (playback unit) because you may use your computer. Add \$995 for laptop computer.

**Ordering your Ragtime MIDI system**

Ragtime products are available in 3 configurations:

1. Cabinet model complete - Many photos and suggestions included in both catalogs
2. Open Frame complete - Photos of individual components and suggested layouts
3. Components incomplete - Components pictured in Catalogs

If you want a cabinet model which is pictured in our catalog, the choice is simple and different woods are available at an additional cost.

If you want an open frame systems such as a steel drum band for a water park, the choices get a bit more complex.

If you want to purchase components and assemble it yourself then the sky's the limit and the choice is yours.

Some suggestions for an open frame system are:

Power -

- 110 volt ac
- 220 volt ac
- 12 volt DC - Battery

Steel drums

- Weather resistant, avoid direct sunlight if possible
- Hang upside down from truss or ceiling.
- Mount in a group as though they would be played by hand.
- Use between 1 and 11 drums to address the widest number of notes.

Calliope pipes

- Weather resistant
- Mount inside large pipe facade
- Use fogger system, MIDI operated, to simulate steam
- Daisy chain more than one rank for a surround sound
- Mount as separate pipes and valves
- Mount as complete chests

Drums

- Weather resistant, keep out of direct sunlight
- Mount as they would be used in a band
- Mount high in truss or on ceiling
- Mount on the wall facing out
- Use 6 different tom toms for maximum effect.
- Use small roto toms to conserve space
- Use Large Congas for maximum sound effect
- Use Bongos to simulate congas to conserve space
- Complete percussion set

Cymbals

- Mounting choices
- Use all 10 cymbals for maximum effect
- Use one cymbal to simulate 10 cymbal voices to conserve space
- Use high quality cymbals
- Use low quality cymbals

Pianos -

- Not weather resistant
- 1, 2 or 3 pianos in unison or
- Pianos playing different musical parts
- Grand, upright or spinet pianos

Accordion

- Not weather resistant
- Large concert grade
- Medium concert grade
- Student grade
- 1 or two accordions

Low and High range

Glockenspiel

- Weather resistant
- 27 note vertical
- 24 note horizontal - tapered config.
- 24 note horizontal - cathedral config.

MIDI connections

- Wireless
- Distant (More than 50 ft. apart)
- Portable (12 volt)

Facade

- Use your design team
- Use our prototype department

Karaoke and announcement translator.

Computer set up for MIDI playback. 40 GB hard drive will hold about 50,000 songs. Standard 3 1/2" floppy drive included. Refurbished. \$1,895 ea. USB. MIDI port adaptor included and installed.

Laptop swivel mount for under piano keys. - \$240 ea.

MIDI song index catalog available \$10. More than 5,000 songs listed for various instruments. All songs \$5 each.

### MIDI processor Partitions and output pin assignments

Each UM-128 processor has 128 outputs. The standard available current is 250 ma at 12 volts per output. The power processor has 500 ma at 12 volts available per output. Each output needs to be assigned a MIDI note in order to carry out it's function. If no MIDI note is assigned, then it will not operate. Our program allows complete flexibility. If you accidentally hook up the outputs two numbers of f, you can compensate with the software by just telling the processor that the appropriate outputs are two notes of f. You have 16 available partitions per processor. If you cross wires by mistake, you may un-solder or you may correct with two software partitions, it's that easy.

We have assigned the following output partitions to accommodate the maximum number of MIDI notes per processor. This saves space and money. Only one of many possible configurations, we try and stick to these guidelines so that the same music will play on all Ragtime MIDI devices. If your files are configured differently, a simple rearranging of the music may be necessary.

#### UM-128 pin Processor Pin and partition assignments

MIDI Notes	Pin Numbers	Channel	Instrument
35-81	0-27 109-127	10	General Percussion
8-19 and 92-94		10	Drum Reassignment
28-55	None	2	Bass Surr Module
28-105	28-105	1	MIDI Piano
56-93		12	Calliope Pipes
82-105		14	Glockenspiel or Bells (24 Note)
70-93		6	24 note Marimba
48-96		6	49 bar Marimba
60-89		6	30 bar Marimba
53-93		8	F4- A7 Accordion (41 Note) Mid range
60-83	Lead Pan	6	C5 - B6 Steel Drum (24 note Melody)
8-79	8-79 notes, fretters etc.	7	E2 - D5 Electric Guitar
8-79	8-79 notes, fretters etc.	3	E3 - D6 Guitar (35 notes, not in chromatic order)
2-65	7-65 notes, fretters etc.	4	C5- G7 Banjo (27 notes, not in order)
67-122	67-122	4	G4 - A6 Ukulele (27 Notes, not in order)
85-116	85-116	3	E2 - G4 Bass Guitar (28 notes)
Lyrics (can be with any channel, event or staff views)			
8-79	6-77	3	E3-D6 Nylon String Guitar
37-43	100-109	10	C#2-G2 Tympani Drum Low (1 of 2) relay pin 125
44-50	110-119	10	G#2-D3 Tympani Drum High (2 of 2) relay pin 125
124	124		All Channels Relay Stat

Ragtime Marimba music on Ch. 9 is arranged for a 49 note Marimba.

Master/Slave  
All Ragtime units come with a MIDI in port and a MIDI out port. The MIDI in port is to be used when the Master/Slave switch is up for Slave. The MIDI out port is to be used when you want to use the onboard computer as a Master and the switch should be down for Master.

#### Designated Synthesizer Channels

Guitar Synth - Channel 13  
Bass Synth - Channel 2  
Drum Synth - Channel 10

Channel 11 is Banjo Synth  
Channels 0,5,9,16 and 17 are currently unassigned and may carry Synth data.

Channel 7 is the Electric Lead Guitar with Bending Notes

#### The Ragtime Drum Reassignment

General MIDI allows for 47 rhythm instruments of which most are drums. They are all listed in the catalog on our MIDI map page. All these drums will not fit into a 24" by 24" by 72" guitar cabinet so we "distill" them. After the song is arranged and the drums are "played in" we run a special program developed by us just for this. This program takes the large drum sequences and assigns them to smaller drums. For example, all High Conga MIDI notes become High bongo. This allows us to play the general MIDI sequences on only 15 rhythm instruments which do fit. The instruments used are as follows: Bass Drum, Snare Drum, 12" Splash cymbal with 3 different beaters, Cowbell, High Agogo Bell, Low Agogo Bell, High Woodblock, Low Woodblock, High Bongo, Low Bongo, Triangle, Maracas and Tambourine.

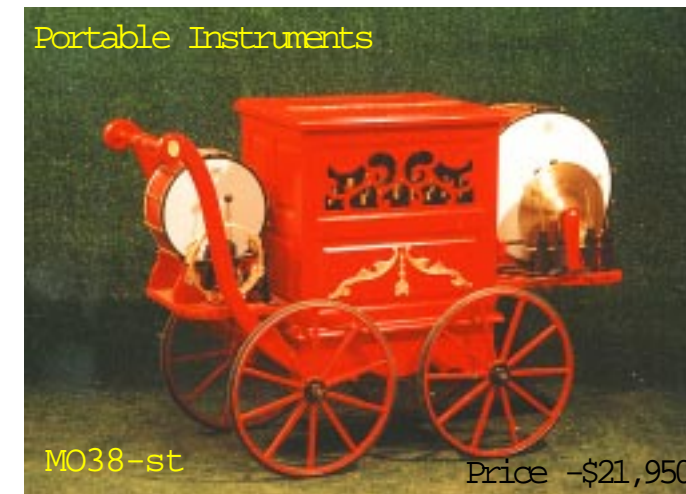

In order for the MIDI piano to sound complete and to turn on automatically, all other instrument channels must be addressed and their partitions in the processor firmware must be set to midi notes 28-124 equal outputs 28 to 124 if the instrument is not contained within the orchestration, ie: Ch. 15 will be 28-124 = 28-124 when there is no marimba. It will be Ch. 15 - 70-93 = 62-85 when it is there. This allows us to make only one arrangement that will play on many combinations.

**Note:** MIDI pipe valves consume close to the maximum allowable current per output pin. You may not connect anything else with the same output pin as the pipe valve, however two miniature MIDI valves may be operated by one output pin but not three valves on one pin. If you must connect multiple valves to a single pin then you must use our power processor which can operate two pipe valves or 4 mini valves. It costs slightly more.

### Crank Organs

### Portable Instruments

MO38-st Price - \$21,950

Same as MO38 with Bass Drum, Snare drum, Cymbal with 4 beaters and Tambourine. Electric or Battery, not crank. MIDI only.

Available with 38 pipes for \$19,950 Add \$950 for the cart. 12 volt DC operation. Crank 30 hours without a charge or run automatic with motor supplied for 8. MIDI player included. Hook to any of our MIDI pianos or drum units for wonderful staccato. Solid Oak or Red. Standard MIDI format 1. Comes with 25 old world songs. Metal wheels standard, for rubber tires add \$250. 38" Tall, 32" wide and 48" Long. Weighs 130 lbs. Add \$150 for special colors.

Monkey organ. Crank Model only. General MIDI format 1. 12 volt. Weighs about 27 lbs. Adjustable monkey. Adjustable strap. 25 songs included. Walnut cabinet. Price - \$11,950

### What sort of a trade in do you have?

Little Circus Wagon  
Plays audio CDs of Calliope or Band Organ music. Cell cell batteries allows 35 hours of operation before a charge. Rubber tires on metal wheels \$7,950

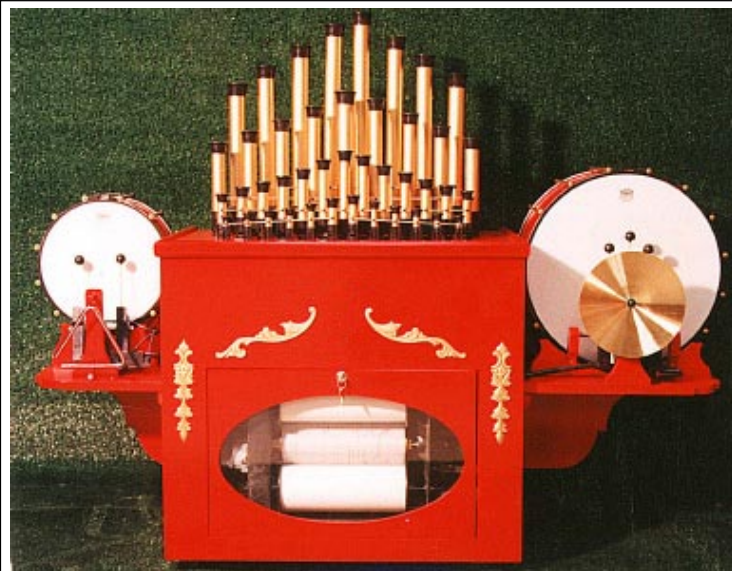

Sometimes someone shows up with an unusual trade. This was told to me to be a calliope-circus wagon. It was a circus wagon, but there was a Wurlitzer 150 band organ on it! Quite a treat. We often have antique machines traded in. Everything from a 15" Regina music box to the mighty Wurlitzer. Ask for current stock.

We accept virtually any antique. Our showroom is full of curious items as well as Ragtime products. Slot machines, Victrolas, Clocks, Music boxes, antique pianos and more.

Special Theme Parade Attractions

### Model D42r

Painted Red with Gold trim the D42r is our most popular band organ. Containing 42 Calliope pipes, Bass and Snare Drums with solid brass hardware, Cymbal and Triangle. Continuous free play that accommodates 10 - 15 tune "O" rolls that automatically rewind to play again. 5' wide and 4'3" high and 23" deep it weighs about 180 lbs. Drawing about 8 amps at 110 volts AC. Plays nicely with a 1000 watt generator or 1200 watt inverter available from us with a 12 volt battery supplied by you. Our traditional air calliope for your home - carousel - fun center or concession.

D42r price assembled and ready to go: \$11,850

MIDI version - \$17,000 (kit, \$8,450) with FC

Kit price, less cabinet: \$7,950 Cabinet with pipe chest and drum shelves, unpainted: \$950

Coin op available for an additional charge.

### Model 42- in frame.

Frame version. Mount in your own cabinet. Totaling operational.

Price - \$9,850

42 Kit only less cabinet: \$5,750 (roll)  
Cabinet with chest, less glass: \$1,000

All Pipe models are the same price in MIDI but come without the sequencer (playback unit) because you may use your computer. Add \$995 for a sequencer.

### Model 42

Our traditional red air Calliope mounted on a Model T truck. Same as above but without percussion. Custom colors and cabinets available. Get some peanuts and popcorn ready! About 150 pounds. Plays O rolls as do all our instruments.

Price \$11,950 MIDI

### D42r-12k

This is a very popular configuration. Same as the D42r above but with a 12 note Glockenspiel on the front. Wonderful Band Organ sound!

Price -  
\$14,850

### 44rK-1

Keyboard and O roll Calliope with automatic/pedal operated Bass Drum

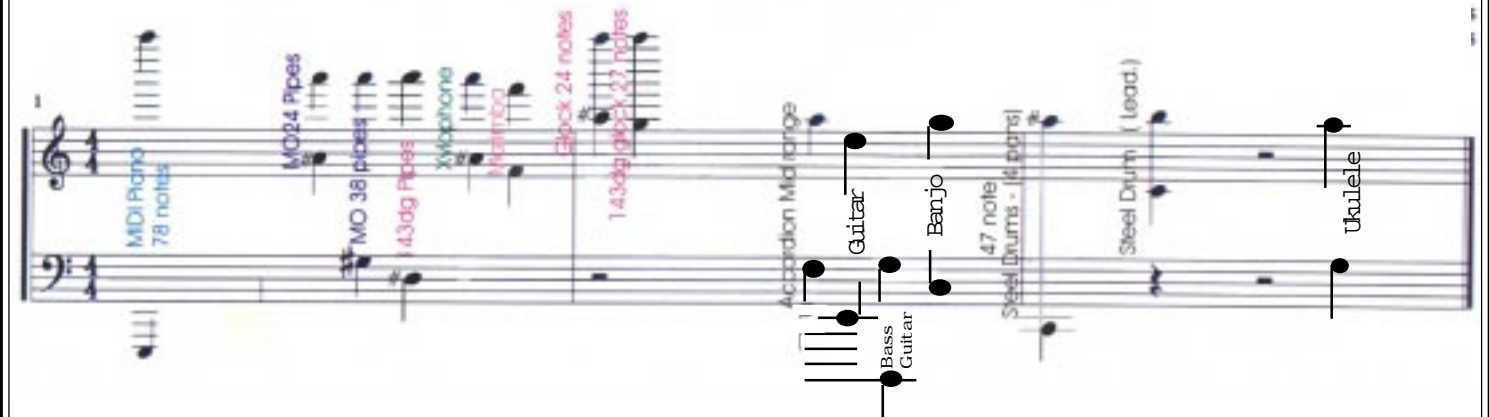

With 44 pipes this authentic air calliope is instantly reminiscent of the bygone era of steam calliopes and the Circus. Has one more pipe than the traditional calliope. Play it manually or use the automatically rewinding O rolls listed in the back of this catalog. The weather resistant cabinet is built to withstand abuse. The bass drum has a bass beater on each side to give it that marching drum thump! Take it in a parade with a 1000 watt generator. Weighs about 130 lbs.

Price - \$16,900

44k  
Solid Oak cabinet, same as 44r-1 but without the drum. \$155,900

## Ragtime MIDI instrument ranges - Staff View

Rearranging - Music rarely needs to be arranged due to the large selection of available tunes on the internet. However, to achieve dramatic results one must rearrange the channel assignments and occasionally the key. When selecting channels for each tune refer to the above staff view. For example, you have downloaded a classical piece written for orchestra. It contains a musical score for flute. You notice that the highest note and the lowest note requested in the piece fall within the range of the MO38 pipes. This one would be perfect to assign to channel 12 - pipes. When the processor sees this, all the notes on channel 12 will be directed towards the Ragtime flute pipes. Likewise if you're working on a calypso piece and it calls for steel drums in the range of our 47 note steel drum ensemble then you will change the channel to 5. If the steel drum melody is high and falls into the range of the Melody pan then you will choose channel 6.

If you are working on a piece that is written for alto sax and it falls in the range of the accordion then choose channel 8. Channel 10 is always general MIDI drums. Never transpose channel 10. If you want to transpose the song you are working on be sure to deselect channel 10 first. Channel 1 is usually piano. We use channel 1 too.

Transposing - Sometimes the melody is just a few notes higher than the range of the instrument you are playing. When this happens make sure you select all the instruments except the drums on channel 10 and then transpose the song down until it falls in the proper range. If the bass notes fall out of range and you want them to sound, you must select just the bass notes and move up by a function of 12 half steps. There are 12 half-steps in an octave. You must always move individual instruments by 12 half steps either up or down. To move notes up or down by a number other than 12 you must select all instruments except the drums.

Copying - The music is kept on a track for each instrument. There are more than 200 tracks available. A track is just a line. It has no musical significance other than holding information. If you are working with a song that has only a few tracks and you want more just select the track and click on copy. Select a new track number and click on paste. You now have a new track which can be transposed for another instrument such as glockenspiel, offset for a marimba effect or just used the way it is. Perhaps you want to have a piano duet. Just assign one track to channel 3 and the other track to channel 4. If the tracks contain different notes such as theme and accompaniment then you will have your two pianos playing different parts for a duet. You can rearrange a piece intended for piano in this manner and end up with 6 tracks for 5 additional instruments. To produce a marimba effect for steel drums just copy a track and leave it on channel 6. Shift one track over a little to produce the same notes as on the other track but a little later. This will produce double notes or a marimba effect. Transposing by 12 half steps will create the traditional Ragtime walking bass.

Song Suffix: A - Accordion B - Bass Guitar b- Bass for Listening on Channel 2 and bass guitar track as well C - Calliope (flute pipes) D -Drums E - Expression F - Flute G -Guitar H - Short version J - Banjo K - Glockenspiel (Bells) L - Lyrics m -travolo P - Piano S -Steel Drums U - Ukulele X - Excellent Y - Rosewood Xylophone (Marimba)

Song Prefix: TG-Tango T - Tympani Drums BT - Beatles Y and y Synth version z -Finished

BT-Abbey Road=ACBDGP  
Beatles-Song name=Instruments played

### Ragtime MIDI map

**Note:**  
Output 124 is used for instrument relay on signals, for all channels.

**Channel 10**  
Midi Note

**Note:**  
There is no actual international general octave agreement as to which note is Middle C. We use MIDI note 60, the same as cakewalk uses. Highly Liquid uses C4. Some Europeans use C3.

**Note:**  
On outputs are the same on all channels. Guitar will be on 3, Banjo on 4, piano on 1 etc. This allows the merged units to rest between parts of songs. (MIDI note 124) Except for Tympani which is on 125.

Drum Reassignment	MIDI #	Instrument	Out/Input #	MIDI Key	Note

**Drum Reassignment**

**Channel 10**

**Note:**  
Output 124 is used for instrument relay on signals, for all channels.

**Channel 10**  
Midi Note

**Note:**  
There is no actual international general octave agreement as to which note is Middle C. We use MIDI note 60, the same as cakewalk uses. Highly Liquid uses C4. Some Europeans use C3.

**Note:**  
On outputs are the same on all channels. Guitar will be on 3, Banjo on 4, piano on 1 etc. This allows the merged units to rest between parts of songs. (MIDI note 124) Except for Tympani which is on 125.

**Note:**  
On outputs are the same on all channels. Guitar will be on 3, Banjo on 4, piano on 1 etc. This allows the merged units to rest between parts of songs. (MIDI note 124) Except for Tympani which is on 125.

### Grade 3 Cabinets

With all the good qualities of a nice grade 2 it will also have carving or applique on the front around the stained glass opening marked by elegance and style with carving often on the sides of the leg portions. Nice moulding, beaded trim and carved pilasters. Often a 3 inch moulding skirt around the bottom. The lids will sometimes follow a path around the pilasters. Note special shapes for glass openings.

Oak Grade 3 GR, Rose Panel Beckwith \$24,950

Mahogany grade 3 ST, Tulip Glass \$18,950

Oak grade 3 GR, Sea Shell glass \$23,950

Oak grade 4 GR, Sunburst Glass Wing and Son \$29,250

Walnut grade 3 GR, Phoenix Glass \$19,000

Walnut grade 3 D, Flower Glass \$17,300

### Grade 4 Cabinet (\$19,000 as piano without player system or glass.)

All the good qualities of the grade 3 but more pronounced and often more extensive carving. Sometimes carved on all surfaces. A very rare cabinet, sometimes custom built by famous furniture makers such as Gustave Stickley for very wealthy clients. Only about one out of a thousand will be a grade 4. For this reason we make our own RAM 2 Solid Oak cabinet for the fortunate few. Antique grade 4 cabinets will sometimes have carved figures, lions, faces, cherubs, extensive flowers and even scenery. Quite often they were constructed of Mahogany but some times used even more rare and exotic woods. Most were made during the "Gay 90's" between 1890 and 1905.

Walnut grade 4 ST, Oval top, flower bottom, nice example of a custom grade 4 cabinet \$22,800

Mahogany grade 4 GR Price \$19,800

Note close-up to right. We have these available in Bronze, cast from the original.

Rosewood Grade 4 B. Shninger

One of the nicest cabinets ever made! Notice the claw feet and fire detail. Price - \$29,000 as a Style GR when available. \$35,000 MIDI

## Upright Piano Grading Guide

Stained glass pattern guide, Wood Grain guide and Ragtime Piano Style Guide

### Grade 1 Cabinets

Plain in every aspect. Square Legs, usually tapered. Flat Sides, square edges. Relatively little moulding, simple and uncluttered. Some cabinets may be considered Mission period. Circa 1913 to 1927

Note: Some Special Name brands will elevate a cabinet one grade, some of them are: Bush and Lane, Bush and Gertz, Wing and Sons, B. Shoninger, Neuman, Beckwith, Cunningham, Crown, Chickering Bros. (Not Chickering and Sons), Steinway, Cremona, Seeburg and Adam Schaff, Wurlitzer, Sterling, Krabe.

Style D has piano only (add \$2,500 for MIDI)

Style ST has Bass and Snare drums, Tambourine and coin op. (add \$2,750 for MIDI)

Style A has Accordion, Bass and Snare Drums, Tambourine, Triangle, Woodblock and coin op. (add \$3,500 for MIDI)

Oak GR grade 1 Flower Glass \$16,500

Mahogany G R grade 1, Phoenix glass \$16,500

Walnut D Grade 1, Phoenix Glass/ Coin op. \$13,500

Oak Grade 2 ST/oval top glass, flower bottom \$16,200

Oak Grade 2 ST/Custom top, oval bottom \$18,900

Walnut Grade 2 ST Sea Shell Glass \$14,000

Oak Grade 2 G R/ pipes, Custom Glass \$19,375

Walnut D grade 2 with Coin op. \$12,500

Walnut St, Sea Shell Top/Oval Bottom - \$14,450

### Zr-GRA (solid Oak)

This fabulous Orchestric will surpass your expectations. Contained within the beautiful solid oak, hand crafted cabinet you will find: 24 Orchestra Bells (Single strike Glockenspiel and 25 note Accordion. Bass and snare drums, cymbal, triangle, tambourine and Indian woodblock. Our Ragtime quick change "O" roll spool frame is standard which plays 15 tune automatically rewinding rolls. An automatic soft and loud pedal helps create a chillingly realistic big band sound. With a high quality restored antique piano at it's core, it is quite possibly the best Orchestric made today! Remarkable! 6'3" high, 6' wide, 29" deep and around 980 lbs. A quarter coin mechanism is standard.

Price \$52,950

Stained glass add \$4,950 (not included).

Add \$500 for bevelled glass

This fantastic cabinet is available in an unfinished Kit form. Comes complete with assembly video that shows how to attach the new cabinet to an existing upright piano. The piano, glass or carving is not included. Price - \$7,950

### Z-GGS-Y

For a Carved Cabinet- add \$2,500  
Add \$1,500 for Cherrywood

Contains Electric Jazz Guitar, Acoustic Classic Guitar, Steel Drum, 24 note Glock, Bass, Snare, Bongos, Cymbal, Maraca, High and Low Woodblocks, High and Low Agogo bells, Tambourine and cowbell. The piano is a weighted key, 88 note Synth. The unit comes apart for moving up stairs and tight places.

Stained glass panels available and priced on page 40

### Zm-GRP

Can be operated it from any PC within 50 feet or a PC with Touch screen in the center is available for \$700.

Price \$69,950

Contains 24 note Glockenspiel, 38 note Flute pipes, piano, Bass and Snare drums, cymbal, tambourine, high and low woodblocks and triangle.

### Zr-GRA-5

Contains Piano, 25 note Accordion, 12 note Glockenspiel, Bass and Snare drums, Tambourine and Cymbal.

Price- \$59,950

### Z-GGS-Y

Price - \$98,950

Add \$1,950 for a 12 String Guitar

### Style -Z-ST

Contains Piano, Bass and Snare drums, tambourine.

Price - \$54,950

**RAM 2 Style GR (Solid Oak)**

This is our custom built Grade 4 cabinet. We can build it in a Variety of woods. With 6 instruments the GR has been our best selling Orchestral piano. It contains a 24 note Glockenspiel, Bass Drum, Snare Drum, Piano, Cymbal, Tambourine and a 25 cent coin op. or free play. the average dimensions are 73" wide, 54" tall and 30" deep. These are rebuilt antique pianos circa 1907. The average weight is around 800 pounds. We crate them for safe shipping anywhere in the world. the average shipping cost to the East Coast of the U.S. is only around \$900, less when closer.

RAM 2 GR Price in Solid Oak \$28,500  
Genuine restored Antique cabinets (pictured on pages 30-33) converted to Style GR orchestrations Kit price :\$8,500

(add \$3,900 for MIDI, less PC)

	Grade 1	Grade 2	Grade 3	Grade 4
Mahogany	\$12,500	\$15,000	\$21,500	\$24,500
Walnut	13,000	16,000	22,000	26,000
Oak	14,500	19,000	26,500	28,500

Convert any piano, upright or grand to an Orchestral piano!  
Style GR conversion kit \$7,500  
Contains everything to convert any upright piano into a GR such as the one above except the Stained glass and the piano.

Since our development of the MIDI to roll interface, we have the ability to make custom rolls rapidly. The usual turn around can be as little as 2 weeks. This list will grow as our customers make their requests for songs. The rolls with the s affix designate short versions for coin op models. Most songs are between 45 and 60 seconds long.

LB-GJ-S

Pedestal for Big Bertha

3SDWB-2y

\$33,500

This is large MIDI orchestrion is 12 feet high and contains all the instruments of our LB-47 along with a banjo and guitar. This marvelous instrument can be seen at Mountain Pastimes toy store in Nevada City, CA. They only charge 5 Cents per song, can you believe it? There is another in Bettystown, Ireland near Dublin.

Price - \$169,000

Add \$1,950 for a 12 String Guitar

Other instruments can be added - see page 20 for details

**Big Bertha Special**

Price \$189,000

This is our Big Bertha Special, there is one in Toowoomba, Australia near Brisbane. It sounds as good as it looks. A store featuring Ragtime products there is coming soon..

Add \$1,950 for a 12 String Guitar

**3SDWB-2y**

To the left is our special 3 steel drum combo. It has 2 double seconds with 30 notes and 1 melody pan with 24 notes. Included is a Synthesizer to play the backup instruments and a surround sound system to balance it out. Fantastic sound of the Islands. Comes with our 10.4" touch screen, PC and 2 conga drums. A coin op or Bill acceptor is extra.

**ST Rustic Oak Grade 2 - \$13,500**

Contains Bass Drum, Snare Drum, Tambourine, Piano and Coin op. Plays 15 tune "O" rolls that automatically rewind to play again.  
Price in Mahogany Grade 1 - \$10,000

**ST Rustic with bottom Stained Glass added**

Price in Mahogany Grade 1 Cabinet - \$13,950  
Price in Oak Grade 1 Cabinet - \$12,950

Add \$3,000 for MIDI slave conversion - Add \$1,500 more for a PC and touch screen -  
Add \$2,500 for Synth with Surround sound

In response for the demand for a low priced but dependable coin operated orchestrion we offer the Rustic. It is carefully refurbished inside with our all new pneumatic player mechanism. The exterior is left original with all the large nicks repaired. A coat of lacquer restores the lustre. The keys are original if in good condition, otherwise they are replaced. The ST Rustic bottom panel is clear plexiglass to exhibit the drums. The D Rustic is the original plain wood panel. These pianos sound just like their more expensive counterparts, but the finish is rustic. Many customers actually prefer the rustic, especially Antique Stores, Theme Parks with a wild west theme, customers on a limited budget and someone who just wants to do their own refinishing later. The original decal is usually still visible on the fall board.

**Commercial Application notes:**

All Ragtime products are built to the highest possible quality. Some features are an extra charge because not everyone wants them, some of these features are:

**Ask about Shared Revenue!**

**Style ST Ragtime Nickelodeon player pianos**

Contain two stained glass panels, lit from behind, Bass Drum with two timpani beaters, Snare Drum with tap and roll and a tambourine to accentuate the beat. A 10 tune automatically rewinding "O" roll frame is standard with volume control on all our pianos. The 25 cent coin op can be bypassed with a flip of the on/off switch. Comes with one 15 tune roll. (add \$3,500 for MIDI kit or \$4,000 for both roll and midi -no PC)

Price - \$107,000

This is the Ragtime MIDI Gazebo. Shown here in Orlando, Florida. Comes with a variety of instruments and the roof type of your choosing..

About 14 years ago we sold two guitars to a record producer in London. Well evidently 2 of them ended up with George Harrison of the Beatles. George wrote the theme song to Lethal Weapon 2. George and his wife Olivia became friends with Richard Donner and his wife Lauren Shuler Donner. In March 2010, while directing the 4th X-Men movie in London they visited Olivia and notice an automated guitar in her home. She directed them to us and they had us build them an automated Ukulele with accordion accompaniment for the home in Maui. I asked Richard if he would let me film his testimony and you may watch it on our website. Richard says that we make music the way it should be made. With real strings, real instruments and real music.

Noted Grammy award winner Pat Metheny is currently performing using several Ragtime instruments played from a MIDI guitar, keyboard or sequencer. Pat has been nominated for Grammy 33 times and currently has 17 Grammys. The Pat Metheny Group has been around for more than 35 years! It has been an honor working with Pat and we look forward to building him new instruments this winter when he returns from his 160 city world tour.

Prices for custom instruments are available upon request.

A 64 note Concert Marimba being assembled

3 Ft wide GJb with accordion

This is our 3 foot wide version of the GJb. This one has Accordion and 12 note Glockenspiel added. Price as shown- \$83,750

Coin operated Steel Drum

14,950

Available without drums as shown on the left.  
 Price \$9,950 roll  
 \$17,950 MIDI  
 Or with 7 Rhythm instruments as shown on the right. Contains C melody pan, Bass Drum, Snare Drum, Agogo Bell, Wood Block, High Bongo, Low Bongo and Tambourine.  
 Price: \$12,750 roll  
 \$19,750 MIDI

Shipped with a single coin mechanism. A multi coin mechanism using a coin comparator is available for an additional \$195. The comparator compares any coin you place in it with all coins deposited. If it is the same coin it issues a pulse. If it is not it is rejected. There is also a coin accumulator available for an additional \$325. The accumulator will allow the unit to charge 1 to 8 coins per play. Owner adjustable. Dollar Bill acceptor \$500. Stacks up to 1,000 bills.

FiberGlass coating available for outdoor use. Add \$450.

\$16,750

CAR-5 Price \$12,750

CIR-5 Price \$12,750

New Rolls being out each month. Videos are placed on YouTube of a Ragtime instrument actually playing the roll so you can decide which rolls you want. One of the changes in our roll production is that we now make 25 tune rolls which have songs lengths of about 1 minute. This seems to be the limit of most attention spans for coin operated machines in public places. Also these rolls have two coin drop holes for each song making them 50 cents a play. The overall result in revenue is much higher than with the 3 minute songs at 25 cents. Most rock and roll and country tunes repeat the chorus 4 or 5 times. This is fine when there are vocals because there is a story to listen to, but with only a piano or guitar it can get boring for the employees that have to listen to it playing all day long. Disneyland has a 10 tune unit playing all day long and someone has cut the cord twice.... You will enjoy the 25 tune short songs more. The roll can play over and over and doesn't get boring. Enjoy.

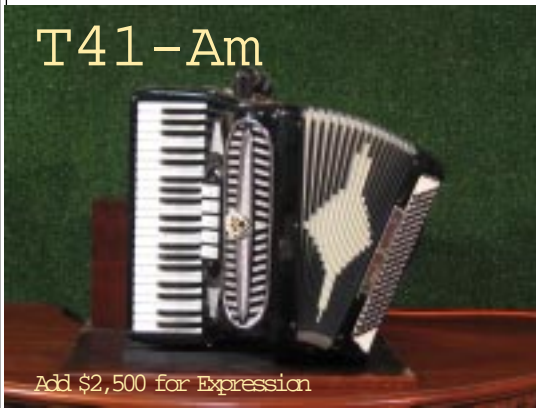

This is a photo of our founder, Ken Caulkins with our customer, Dale Earhardt jr. a famous Nascar driver.

## The Ragtime Castaway Band

We rent our  
Ragtime Castaway Band  
for \$2,000 minimum, \$1,000 per  
day. Shown here at the 2012  
Maker Faire in San Mateo, Cali-  
fornia. We won best of show from  
all 5 judges! 5 Blue Ribbons!  
125,000 people paid \$28 each to  
come to the fair.

We now make our guitars, banjos, bass and other stringed  
instruments in an open frame for hanging. Fantastic presenta-  
tion.

This Orchestrion may be seen 9-4 Monday - Friday at the Ragtime Showroom in Ceres, California  
There are others in Bombay, India (Bollywood), Amersford, Holland, Bogota, Columbia, Dalian, China as well as  
private collections around the globe.
